

Scotty Cameron® Adds New Phantom 3.2, 12 Models to Mallet Lineup

New mallets bookend tour-proven 2026 Phantom™ family with distinct performance profiles

▲ Scotty Cameron Phantom 3.2, 12 putters

CARLSBAD, Calif. (June 16, 2026) — Scotty Cameron introduces the **Phantom 3.2** and **Phantom 12** putter models, bookending the tour-proven 2026 Phantom lineup with new mid-mallet and high-MOI mallet designs to target distinct player needs and preferences:

- The Phantom 3.2 is a compact, manoeuvrable mid-mallet that blends soft, rounded contours with straight, clear alignment features.
- The Phantom 12 offers a large, confidence-inspiring footprint with the deepest and lowest centre of gravity (CG) of any Phantom putter to maximise stability and forgiveness.

Every model in the 2026 Phantom lineup is crafted and precision milled to deliver a softer sound and feel while preserving feedback off the putter face.

Landing in golf shops worldwide this summer, the new 3.2 and 12 models complement Phantom's diverse range of head and neck configurations with tour-inspired shaping for more confidence over the ball.

MODEL OVERVIEW

Phantom 3.2

- **Style:** Mid-mallet
- **Neck style:** Plumbing
- **Alignment:** Tri-Line, T-Crown feature, ball-framing windows
- **Dexterity:** RH and LH

▲ Scotty Cameron Phantom 3.2 putter

The new Scotty Cameron Phantom 3.2 model is a compact, maneuverable mid-mallet that blends rounded contours with clear, straight lines. It features a “.2” plumbing neck for moderate toe flow and leverages multiple alignment cues, including a Tri-Line sight line as well as the putter head’s T-Crown design and open slots, or “windows”, which help frame the golf ball at address. The 3.2 employs a full-face Studio Carbon Steel (SCS) insert with chain-link face milling to fine-tune sound and feel while preserving ball speed off the face.

“The mid-mallet category is really popular on tour, and the 3.2 was basically designed to blend together different iconic Cameron shapes from the past,” explained **Austie Rollinson**, Senior Director of Putter R&D for Scotty Cameron. “The face profile was influenced by the Red X model. The rounded footprint has some of the GOLO 6 in it. We wanted to bring in the T-Crown detail of the Phantom 9, which allows the sight line to stretch the length of the head from front to back. And then lastly, the ‘slots’ really came from the old Kombi model, which is a great way of both removing weight and creating an additional alignment feature.”

Phantom 3.2 is designed for players who prefer:

- Rounded putters like Newport, GOLO or Fastback models;
- Compact mallets like the Phantom 5 or 9R shapes;
- A smaller, manoeuvrable footprint;
- A combination of soft contours and straight lines.

Phantom 12

- **Style:** High-MOI mallet
- **Neck:** Mid-single-bend shaft
- **Alignment:** Single sight line, T-Crown feature
- **Dexterity:** RH

▲ Scotty Cameron Phantom 12 putter

The Phantom 12 is a larger mallet with the deepest and lowest CG in the Phantom lineup, unlocked by its multi-material construction and ring-weighted design. Space Grey aluminium comprises the putter's face and mid-body, while heavier stainless steel is concentrated lower and towards the perimeter of the head to increase stability and forgiveness. Steel makes up approximately 65% of the model's total head weight.

“The CG of the Phantom 12 gives golfers a pretty unique feel through the stroke,” said Rollinson. “It's that distance between the CG of the head and the putter's shaft axis that gives them that feel of stability when they're swinging it. It also can change the low part of the arc as well so that the stroke bottoms out sooner, causing players to hit slightly up on the ball and generate forward roll.”

The Phantom 12's larger, confidence-inspiring footprint is complemented by a long, single sight line for precise alignment. Like the 3.2, the 12 also leverages a T-Crown feature as an additional alignment and framing cue, and a mid-single-bend shaft configuration for minimal toe flow rounds out the setup. Its aluminium face utilises chain-link milling to produce a soft yet solid feel with ample feedback.

Phantom 12 is designed for players who prefer:

- High-stability putter performance;
- A larger, confidence-inspiring footprint;
- The feel of a deep centre of gravity.

NEW PHANTOM MODELS ON TOUR

Since their respective launches across worldwide professional tours, Phantom 3 and Phantom 12 tour prototype models have both been played at the game's highest levels. The Phantom 3 head, which first debuted on tour in July of 2025, has been a popular choice for players seeking the performance benefits of a mid-mallet in a compact, rounded profile.

Ludvig Åberg recently made the move to a Phantom 3.2 tour prototype putter at the Charles Schwab Challenge. In testing, Åberg was drawn to the alignment

features of the model's overall head shape as well as the sound and feel of the Studio Carbon Steel insert.

Over the eight rounds played with his 3.2, Åberg has gained a total of +5.127 strokes on the greens. His average of +0.641 per round after the move would currently rank eighth on TOUR, a jump from his rank of 59th (+0.169) before putting the mid-mallet in play.

Also gaming the Phantom 3 head shape is Titleist Brand Ambassador **Ryan Gerard**, who finished runner-up at the Memorial with his Phantom 3 tour prototype gamer and climbed to a career-best OWGR rank of 23rd.

"I like that it's a smaller mallet," said Gerard in early 2026. "Some of the larger mallets, coming from a blade, they kind of get a little bit noisy when I'm looking down at it, just seeing a lot of clubhead. But this is a really sleek design, everything kind of blends in... The putter just kind of glides nicely and everything looks clean, very compact and very square too, which is what I really like."

A Phantom 3 tour prototype model has also been used to win multiple LPGA titles in 2026.

Phantom 12 prototypes first appeared on tour in February of this year and have since been gamed on both the PGA TOUR and LPGA Tour. The 2024 AIG Women's Open champion and most recent LPGA Hall of Fame inductee was one of the first players to put the new head shape in play, shooting 12-under 60 in her very first round with it. On the DP World Tour the Phantom 12 has been put into play by Ewen Ferguson, Jordan Gumberg and Michael Hollick.

SPECS

- **Loft:** 3.5 degrees
- **Lie:** 70 degrees
- **Stock lengths:** 33", 34", 35"

- **Grip:** Grey Full Contact

AVAILABILITY

NEW Scotty Cameron Phantom 3.2 (RH) putters will be in select golf shops worldwide beginning **June 25**, while Phantom 3.2 (LH) and 12 putters will be available beginning **July 23**. **SRP: £479**
