

LYNK & CO 08 EM-P REACHES 200,000 GLOBAL DELIVERIES

Since its official launch in September 2023, the Lynk & Co 08 EM-P has built a strong reputation through its performance, capabilities and customer acclaim. Expanding from the Chinese market to the global stage, the model has now achieved 200,000 cumulative deliveries worldwide, with a presence across more than 30 countries and regions in Europe, Asia-Pacific, Latin America and North Africa. In the first half of 2026, the model ranked among the top three best-selling vehicles in its segment in overseas markets including Mexico and Morocco.

Over the past three years, the Lynk & Co 08 EM-P has continuously demonstrated its capabilities through a series of demanding challenges. In terms of range, the model set two Guinness World Records: completing the longest distance driven by a plug-in hybrid SUV without refuelling or recharging, covering 1,813 km between Xining and Hami in China; and achieving the longest pure electric range for a plug-in hybrid SUV, travelling 293 km in Toluca, Mexico.

The Lynk & Co 08 EM-P has also successfully completed long-distance expeditions through some of the world's most challenging environments. It travelled more than 7,000 km in 14 days from Yining in Xinjiang, China to the Arctic Circle, enduring temperatures as low as -30°C. The vehicle also served as the official expedition vehicle for the QUEST DAKAR 2026 Rally, crossing borders between three African countries and covering 3,200 km of desert terrain in temperatures reaching 41°C, further validating its adaptability and reliability in extreme conditions.

The model has earned a series of prestigious international awards. In design, it received the 2024 Red Dot Product Design Award. In safety, it achieved a five-star Euro NCAP rating in September 2025 and recorded the highest overall score among plug-in hybrid vehicles tested that year. In the market, it has also been recognised with honours such as "Best Luxury Plug-in Hybrid SUV of the Year" in Mexico and Morocco's AIVAM Car of the Year 2026 award. From range and safety performance to

professional certifications and customer recognition, the Lynk & Co 08 EM-P has demonstrated its competitiveness on a global scale.

The true measure of quality is reflected in long-term customer trust. Lynk & Co 08 EM-P owners worldwide have collectively driven more than 4.4 billion kilometres, while the highest-mileage individual vehicle has exceeded 540,000 kilometres. The model's active safety systems have helped prevent more than 400,000 potential accidents.

This trust continues to grow through direct customer experiences. Recently, a group of Lynk & Co 08 EM-P owners from Kazakhstan travelled to China to visit Geely's Global Safety Centre and the Yuyao manufacturing plant, where they experienced first-hand the vehicle's intelligent production processes, rigorous testing procedures and globally consistent quality standards.

With its combination of advanced electrified performance, intelligent cockpit technologies, comprehensive safety features and premium quality, the Lynk & Co 08 EM-P has established itself as a highly regarded intelligent hybrid SUV for modern families around the world.

About Lynk & Co

About Lynk & Co International

Lynk & Co is more than a car company; it's an innovative mobility provider. Offering a diverse range of electrified cars – from the long-range plug-in hybrid 08, to the fully electric 02, to the popular plug-in hybrid 01 – the brand combines vibrant, cutting-edge design with pioneering connectivity solutions to deliver a forward-thinking driving experience. Established in 2016 and headquartered in Gothenburg, Sweden, Lynk & Co now operates in 25 markets across Europe and is on an ambitious expansion journey, redefining what modern mobility can be.

As Lynk & Co continues its bold journey of expanding into retail sales channels through partnerships with local retailers, more than 140 partner-operated sales points are now open across Europe. This growing network brings Lynk & Co closer to more customers while staying true to its mission: to change the future of mobility – for people, for progress, and for impact
