

Lynk & Co delivers the first 01s to members.

The first Lynk & Co members are officially behind the wheel of their shiny new 01! And we don't know who's more excited about it, them or us. The first batch of 01s has now started to be delivered to members and will be rolling out in across Europe over the next few weeks.

Delivering the first cars has been designed to be hassle-free for members. They'll be able to pick up their cars from Lynk & Co Clubs in Gothenburg, Sweden and Amsterdam, the Netherlands, as well as touchpoints in other key cities. For members who can't make it to a Club, we're bringing the 01 to their door. Home delivery options are available in select locations to make the process super smooth.

Lynk & Co was created to make mobility flexible, hassle-free, and tailored to the connected generation. The delivery of this first batch of cars isn't just a milestone, it's also the perfect example of how we're innovating customer-centricity and a new way forward for the mobility industry.

If you didn't get one of these first 01s, don't despair. The demand is high but there are more cars on the way for the members on our waitlist. Till then, keep your eye on the roads to spot some 01s in the wild...
