

Dev Update

Exciting progress for Holochain devs + Alpha Program Update

It has been a quiet week for our quick updates, but a momentous one in terms of the many huge doors our dev teams are stepping through in so many areas. For full coverage listen to our Holo AMA yesterday, or read the Holochain Dev Pulse just published. [A quick overview:](#)

Holochain v0.0.107

"A release to Build On." This release fully landed the significant performance improvements and developer features that will get immediately used by Dev Campers, Holo hosting apps, and devs in the community building all kinds of hApps.

Dev Camp

The 8th camp has 1,500+ registrants, has live support sessions for every global time region, and promises an outstanding opportunity to learn and meet many other future Holochain devs. They'll be building a game app together to build their understanding of the most important parts of a Holochain app. Register for Dev Camp here: <https://holochain.org/dev-camp>

Launcher & Scaffolding Tools

The launcher lets end users install and use Holochain apps locally. The scaffolding tool lets people design and build Holochain apps. This release let us get these ready for Dev Camp, and they have been updated to the release build and work great.

HoloPort Alpha Program

There were a few bugs that slowed registration down, but those are fixed. We have 566 fully registered HoloPorts and 247 that have started and were slowed down by bugs. Together they meet the 800 threshold so we should be starting the program very soon.

Holo Dev

This Holochain release also opens up next steps on HoloFuel, Publisher Portal and other Holo infrastructure projects.

ABOUT HOLO

Holo is a distributed cloud hosting marketplace for peer-to-peer apps built on Holochain. We're helping to build a better Web.

Holo is to cloud hosting what Airbnb was to hotels—anyone can become a host by turning their computer into a source of revenue, getting paid in HoloFuel for hosting peer-to-peer applications to the legacy web. By hosting P2P apps, you support a web that empowers your peers and communities.
