GTA Brings Faster Internet Speeds to Barrigada Heights

Tamuning, Guam, Wednesday, December 8, 2021 – GTA brings faster Internet speeds to homes in Barrigada Heights. With GTA’s Fiber to the Neighborhood, we can now deliver Internet connections with speeds up to 100 Mbps, all on Guam’s most reliable network.

Nathan Denight, Vice President of Marketing at GTA, says, “In today’s world, a fast, reliable home Internet connection is essential as we are working and going to school from home. GTA continues to invest in bringing our typhoon-proven underground fiber infrastructure to more neighborhoods around our island like Barrigada Heights. With speeds up to 100 Mbps second, it’s faster than you can say Calachucha Avenue.”

GTA introduced Fiber to the Neighborhood in 2015 and has continued to expand throughout Guam. Our construction and technical teams continue to work hard to bring our underground network infrastructure to more areas, and we look forward to more announcements in 2022.

ABOUT GTA

About GTA

GTA provides complete communications services in Guam. These include local and long-distance telephone service, 3G and LTE mobility service, High Speed Internet Access, Dedicated Ethernet, Carrier-Class High Capacity Services over SONET and SDH networks, and advanced television, or IPTV. GTA operates a data center on Guam offering a secure, managed environment for customers who need an alternative site for business data storage. The company also runs Guam's first locally owned Cable Landing Station completed in 2017 and the Gateway Network Connection in Piti.

Based in Tamuning, Guam, GTA is a U.S. and locally owned company and locally managed. The company's website is www.gta.net.
