

GTA Preparing Network and Operations Ahead of Tropical System

(Tamuning, Guam) Thursday, July 2, 2026- With Tropical Storm Bavi expected to move closer to our region in the coming days, GTA has activated its standard storm preparedness procedures and is taking proactive steps to stay ahead of any potential impacts.

Teams across the company are closely monitoring weather conditions and completing routine storm readiness measures, including fueling generators and service vehicles, testing backup power systems, inspecting and securing network facilities, securing Cell on Wheels (COWs), staging recovery equipment, and confirming staffing for essential personnel. GTA's Network Operations Center will remain staffed around the clock to monitor network performance and weather conditions as forecasts evolve.

GTA continues to strengthen its network resilience through expanded backup generator capacity, enhanced power redundancy, and ongoing investments in hardening critical network infrastructure. Combined with the company's established storm preparedness procedures, these efforts help ensure GTA is ready for whatever conditions may develop.

Customers are encouraged to use this time to charge mobile devices and portable battery packs, prepare backup power for home internet equipment if available, enable Wi-Fi Calling on compatible devices, and review their household emergency plans.

GTA will continue to monitor the system closely and provide updates as additional information becomes available.

About GTA

GTA is Guam's leading telecommunications provider, delivering advanced connectivity solutions for residential, business, and government customers across the island. GTA's services include high-speed fiber internet, 5G wireless mobility, and advanced voice and data services for business and carrier customers that support critical infrastructure, enterprise operations, and everyday communications.

GTA operates secure, locally managed data center facilities on Guam and plays a key role in the island's digital ecosystem through ownership and operation of Guam's first locally owned cable landing station and data center in Piti. GTA operates three data centers, with its newest facility, GU3 in Alupang, set to be completed in Q1 2026. Together with its subsea cable investments and network infrastructure, these facilities strengthen Guam's position as a strategic digital gateway in the Pacific while ensuring reliable, resilient connectivity for the community.

Based in Tamuning, Guam, GTA is a U.S.-owned, locally managed company with nearly 75 years of service to Guam and a long-standing commitment to advancing the island's digital future.
