Remote adds a stack of new countries in Q3 2021

Written by Preston Wickersham

Remote is all about rigor. We only offer a new country once we have opened a fully owned legal entity and performed an intensive compliance review to ensure you and your team receive world-class service, support, and peace of mind.

Over the last few months, we have completed this process in several new countries around the world to help you grow your global team.

Remote adds new countries in Q3 2021

We are excited to welcome these new countries to Remote's global HR management network:

 Australia [2 additional states - Victoria, Queensland]

 Canada [Now available in all 10 provinces]

 Chile

 Bolivia

 Greece

 Georgia

 Iceland

 Panama

 Turkey

What happens when Remote opens a new country?

If you follow Remote, you know we never work through third parties. We own and operate our own [local legal entities](#) in every country we cover, and we take the time to make sure our operations are more compliant, more efficient, and more sustainable than anyone else's.

Currently using another employer of record or contractor management platform for your team? Ask your provider about their local entities and compliance in the countries where your team members live. We guarantee no one provides a better experience for your team, more knowledge about local compliance, or stronger protections for your [intellectual property and invention rights](#).

While we only offer employer of record services in countries where we have opened entities, our robust international infrastructure allows us to help you [pay and manage contractors](#) all over the world, right now. If you have contractors in other countries, you can onboard and start making payments in minutes. [Sign up now to get started!](#)

When you use Remote, you show your team you are committed to growing your business the right way. And because we own our own infrastructure, we can offer what no one else can — reliable, flat-rate pricing with no hidden fees and no surprises.

Where will Remote open in Q4?

The year is drawing to a close, but we are not slowing down. We have already begun opening more new countries in October, with several more on the way!

View our roadmap for new countries in our [Country Explorer](#), where you can also get information on things like public holidays, taxes, benefits, and more for each country.

If Remote isn't in the country you're looking for yet, we will be soon! Select any page in our Country Explorer to be notified when we open our local entity in that country. Once we launch, you can begin onboarding new full-time employees there in minutes. Remember: we can already help you manage and pay [international contractors](#) everywhere in the world!

Remote's own team includes more than 400 people living and working in more than 50 countries all around the world. We are working around the clock to bring you the best employer of record and contractor management services on the planet — and never compromising on quality, compliance, or care.

To stay up to date with our new country announcements as they happen, follow Remote on [Twitter](#) and [LinkedIn](#)!

If you have questions about country availability or your global employment plans, we're happy to help. Chat with us online, [contact one of our teams](#), or reach out on social media. No matter where you live and work, we are ready to help you grow.

ABOUT REMOTE

International payroll, benefits, taxes, and compliance for businesses, big and small.
