A Series of Magical Candlelight Concerts Is Coming To Multiple Cities in the US

Having already delighted audiences in more than 80 cities worldwide, including Madrid, London, Paris, New York and Los Angeles, Fever's Candlelight series will continue in many cities around the US in 2022.

January 11 2022 - Candlelight is a Fever Original concept that aims to create an accessible and ambient space to enjoy the works of the greatest classical composers such as Vivaldi, Mozart and Beethoven and modern compositions such as Bach to the Beatles and popular movie soundtracks.

Since its launch in 2019, Candlelight concerts have been performed in unique venues worldwide, from churches to libraries to mansions and other historic landmarks that form part of each city's cultural heritage. This year, the concert series will take place at a variety of additional stunning locations in cities like San Diego, San Antonio, Tampa and much more. Featured concerts include Vivaldi's Four Seasons, tributes to Queen, ABBA and Taylor Swift, and a unique Valentine's Day special.

Candlelight is brought to you by Fever, the leading global entertainment discovery platform. By creating a network of talented local musicians in each city, Fever has been able to provide a platform for these artists and in turn bring classical music to an entirely new demographic. With the objective of democratizing the culture and bringing unique experiences to the masses, Fever's platform enables its 80 million users to discover new experiences in their cities.

Information

Tickets: can be found on Fever's marketplace [here](#), and more information about the experience [here](#).

ABOUT FEVER

Fever is the leading global live-entertainment discovery platform, helping millions of people every month to discover the best experiences in their cities, with a mission to democratize access to culture and entertainment in real life. Through its platform, Fever inspires its community to enjoy unique local experiences and events, from immersive art exhibitions, interactive theatrical experiences, festivals, classical music concerts to molecular cocktail pop-ups while empowering creators with data and technology to create and expand experiences across the world.
