

Solidigm Flexes Storage at RAISE AI Summit 2026 in Paris

Solidigm attended the RAISE Summit 2026 from July 7-9 , engaging in what is billed as the industry's leading AI summit bringing together 9,000 AI leaders, C-suite executives, startups, investors, and policymakers.

The event represented a significant market activation for Solidigm in Europe — with Co-CEO Richard Chin, Greg Matson, SVP and Head of Products and Marketing, and Avi Shetty, VP AI Ecosystem, Solutions and Market Enablement, in attendance with support from sales, marketing, and global communications.

In addition to customer and investor relations, Solidigm hosted a RAISE executive reception and engaged in onsite media interviews. Matson also represented Solidigm on the Day 1 main stage panel “Infrastructure as Destiny,” with leaders from Credo, Clockwork Systems, Inc., VAST Data, and Cloudflare.

"The conversations at RAISE are different from other shows. Senior leaders from organizations of all sizes - from hyperscale to the edge - discussed efficiency, data sovereignty, and build out speed. But storage was the hottest topic, and the realization that planning ahead with experienced and trusted partners is essential to achieve successful AI outcomes. "

Greg Matson, SVP and Head of Products and Marketing, Solidigm

Highlights:

NYSE Wired's theCube hosted onsite news broadcasts. This included an interview with Greg Matson who kicked off theCube's coverage of the event on July 8, unpacking the intelligence layer for generative AI and more.

Greg Matson, Solidigm: How high-capacity SSDs are becoming the intelligence layer powering AI inference and agentic workloads.
