RIDE UNLTD – PURE FREEDOM IN THE CITY

Our cities are changing. Decades of car-centric planning is slowly being reversed. And a better, greener, healthier way of moving around our urban spaces is returning to the forefront. At Canyon, we know the bicycle is the future of urban mobility. Because riding is much more than just a way to get around town. It's the key to a better way of living. The key to unlocking the endless, boundless possibilities and freedom only riding can bring.

- POTENTIAL UNLTD.**
- FLEXIBILITY UNLTD.**
- FUN UNLTD.**
- SPONTANEITY UNLTD.**
- ENJOYMENT UNLTD.**

True freedom in the city.

We call that feeling **RIDE UNLTD.** And our mission is to build bikes that bring that freedom to the masses.

INTRODUCING THE PRECEDE:ON AL

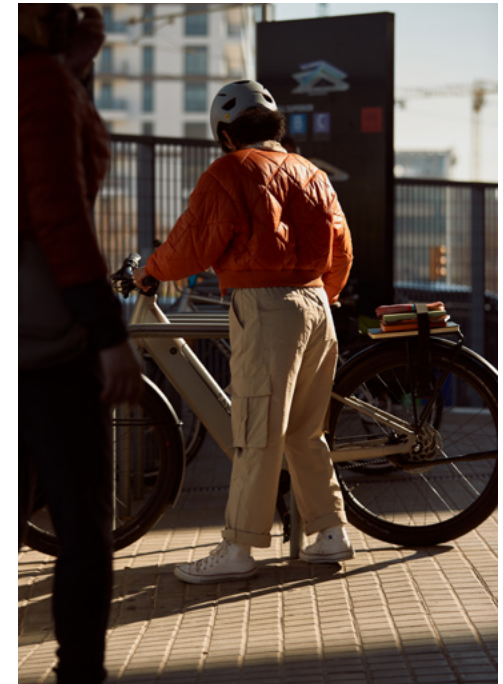

DEMOCRATISING E-CITY PERFORMANCE

In 2020, Canyon launched the Precede:ON CF. It was a bike that brought the spirit of Ride UNLTD to the city streets. Uniting incredible functionality with an impressive set of features and elegant carbon aesthetics, it was a bike made to take its rider anywhere, at any time, for any task. In fine style too, may we add – as proven by the bike's status as a 2021 Red Dot Design award winner. Now, the Precede:ON has evolved. We've ensured that top-tier design, versatility, and functionality is available to even more riders. In an affordable, accessible aluminium package designed for the rough-and-tumble of everyday city riding. The Precede:ON AL has arrived.

EQUIPPED FOR EVERYTHING

With the Precede:ON AL, we wanted to create a bike that could do it all in the city. A beautifully practical year-round alternative to the car. No more, no less. From powering to work in the morning. To picking up the kids after school. To spontaneous shopping trips on the way home from the office. It all comes down to the bike's features. With all you need for the ultimate urban riding experience, the Precede:ON AL makes city cycling fresh and carefree. Unlimited urban freedom. Through unlimited urban mobility.

STORAGE – JUST TAKE IT

Laptop, rainproof clothes, or your shopping – anything. The Precede:ON AL can hold it, easy. So riders can make their moves, when they want, their way.

LUGGAGE

Clip on your panniers, drop in your things and go. It's all possible thanks to a huge 25 kg of rear rack storage with Ortlieb QL3.1 compatibility for instant pannier mounting and removal. Plus, riders can fit an optional front rack with 5 kg storage. The bike is also compatible with special designer baskets for the rear rack.

KIDS, PETS, LARGER CARGO

The Precede:ON is ideal for taking larger items and your loved ones along smoothly and safely. It's all possible thanks to Croozer trailer compatibility – just fit an adapter, click on the trailer, and go. Any weather, any time Freedom is being able to jump in the saddle whenever, carefree. The Precede:ON AL is equipped for easy riding at any time of day, and in any weather.

WATERPROOF YOUR RIDE

Stay clean. Even in the rain. The Precede:ON AL comes equipped with durable aluminium fenders, which stop splashing and perfectly complement the bike's bold aesthetic.

STAY SAFE AT NIGHT

For night riding in the city, a good set of lights is an absolute must. The Precede:ON's lights guarantee you stay visible to all road users. For the ultimate in reliability and convenience, the lights all run off of the bike's battery. The system always reserves enough charge for two hours of illumination if the worst comes to worst, and the motor runs out of power. So you'll never be left in the dark. All Precede:ON bikes come with bright, high-grade, integrated lights – with the Precede:ON 6 upwards equipped with extra high beam functionality.

HILLS? EASY PEASY

To ride effortlessly in any city, you need a motor that can cruise up the steepest hills around. That's why the Precede:ON AL has powerful Performance Line and Active Line Plus motors from Bosch which supply all the power riders need for any city riding scenario. The Performance Line system is reserved for the Precede:ON 6 and 7 line-ups and supplies a big 300% of assistance with 65 Nm of torque, generating natural-feeling support perfect for both in and out of the city. The Precede:ON 5 range is fitted with the Active Line Plus system – with a smooth 50 Nm of torque and 270% peak assist, the motor is impressively quiet and ideal for more relaxed, day-in-day-out city riding. There are 4 support levels, ranging from smooth background support (Eco) to short, sharp boosts when you need them (Turbo). Plus, both systems stop helping at the legal limit of 25 kph.

RIDE ALL DAY

The Precede:ON AL has plenty of juice on tap for all-day riding. XS-M frames fit 500 Wh Bosch PowerTube batteries for up to 100 km of riding range. And size L-XL frames come with a huge 625 Wh of battery capacity, enough to travel a maximum of 125 km on a single charge. And charging is super-easy too – with a frame-integrated charging port, you can either remove the battery, or leave it in the bike for charging.

STEP-OVER

Bold design, dynamic lines. The standard model catches the eye with its unbroken line from the chainstays all the way up through the cockpit.

STEP-THROUGH

Functionality, ease-of-use. Super-easy to mount and dismount even with a kid sitting in an attached trailer or panniers full of gear on the rear rack.

CITY STYLE

DEMOCRATISING BEAUTIFUL DESIGN

Of course, when you're building a top-end bike like the Precede:ON AL, functionality is only half the story. You have to marry that all-city versatility with eye-catching style. To reach the masses, we had to merge the two into a package that was more budget-friendly, without compromising on design and aesthetics.

ACCESSIBLE ALUMINIUM

This new bike makes the Precede:ON's signature style and bundles it into a more accessible alloy package. With its precise lines, striking silhouette, and clean aesthetics thanks to internal cable routing, the Precede:ON AL communicates excellent quality, incredible style, and intuitive simplicity.

YOUR FRAME, YOUR WAY

So everyone can enjoy the Precede:ON AL, we created two unique frame designs.

SMART COMPONENT CHOICES

In terms of parts, we spec the Precede:ON AL for out-and-out utility, with components carefully selected for low maintenance, high comfort, and long-term performance.

Depending on model, the Precede:ON AL has two drivetrain styles – a modern belt drive, or a traditional chain and derailleur setup.

BELT DRIVE

Robust, low-maintenance, mess-free, and quiet – the Precede:ON 7's combo of Enviolo integrated hub shifting and a Gates belt has so many benefits. The sealed hub has an extremely long lifespan and is practically maintenance-free. Grip-shift gear changes are simple, smooth, and quiet. And the best thing? You stay clean and smudge-free because the system doesn't need chain lube.

CHAIN AND DERAILLEUR

The Precede:ON 5 and 6 use Shimano's Deore and XT performance groupsets for long-term durability and light, accurate shifting. The one-by setups combine a single chainring with large cassettes to provide a huge gearing range for steep climbs.

COMPLETE CONTROL, COMPLETE CONFIDENCE

When you're happy in the saddle, you'll truly enjoy your ride.

ALL-WEATHER GRIP: roll confident thanks to high-volume 57 mm Schwalbe G-One Allround tyres, providing huge traction even in the wet.

HAND COMFORT: enjoy relaxed rides with an ergonomically optimised one-piece DualFit CP0023 cockpit and Ergon grips.

POWERFUL WET-WEATHER BRAKING: the Precede:ON AL has hydraulic brakes from Shimano and Magura for precise stopping performance in any environment.

A CLEAN, CLEAR DISPLAY

The neat, minimalist Bosch Purion display shows you the essential information about your ride at the touch of a button, with no distraction from the road.

- Key info: battery charge, speed, riding mode, range, trip distance, total distance
- Outstanding readability: backlit display shows you readable riding data even in direct sunlight
- Easy diagnostics: specialist Bosch service providers can monitor the status of your Bosch e-bike system using the micro-USB port

FAQ

WHEN DOES THE EMBARGO EXPIRE ON NEW PRECEDE:ON AL MODELS SO THAT JOURNALISTS CAN PUBLISH STORIES AND PHOTOS FROM THIS PRESS LAUNCH?

The embargo will end on **01.03.2022 AT 11:00 CET** when the bike becomes available on our website. After that, journalists and media are encouraged to publish their stories and reviews.

WHAT SETS THE PRECEDE:ON AL APART FROM THE PRECEDE:ON CF AND COMMUTER:ON?

The Precede:ON AL represents the combination of high-end e-city performance and versatility, made more accessible than ever. It's more affordable than the flagship Precede:ON CF, and has more torque, more battery capacity and more features than the lightweight Commuter:ON.

WHAT'S THE MAXIMUM AMOUNT OF WEIGHT I CAN PUT ON THE BIKE?

The maximum total weight (rider + bike + equipment) is 140 kg.

HOW MANY PRECEDE:ON AL MODELS WILL THERE BE IN THE LINE-UP AND HOW MUCH WILL THEY COST?

The Precede:ON AL will be available in six models:

Precede:ON 5 (step-over)
Precede:ON 5 ST (step-through)
XS-M: € 2,599
L-XL: € 2,799

Precede:ON 6 (step-over)
Precede:ON 6 ST (step-through)
XS-M: € 2,999
L-XL: € 3,199

Precede:ON 7 (step-over)
Precede:ON 7 ST (step-through)
XS-M: € 3,499
L-XL: € 3,699

The larger sizes cost more because they feature larger 625 Wh Bosch PowerTube batteries.

DOES THE BIKE COME FULLY ASSEMBLED?

The rider only needs to mount the pedals, the front wheel, and seat-post. We provide the tools required and detailed step-by-step guidance on how to do this.

HOW MANY SIZES ARE ON OFFER?

Step-over Precede:ON AL frames are available in size M-XL, while step-through frames are available in sizes XS-L.

THE NEW PRECEDE:ON AL USES THE BOSCH MOTOR AND BATTERY. WHY DID CANYON CHOOSE TO GO WITH THE BOSCH SYSTEM?

We chose the Bosch system because we believe it finds the best balance between punchy power, reliability, compact design, and natural-feeling pedal assist.

HOW FAR CAN I RIDE ON A SINGLE CHARGE?

Speed, terrain and total weight (rider + bike + equipment) all have an effect on the total range.

Max range for size XS–M bikes (with 500Wh batteries): 100 km

Max range for size L–XL bikes: (with 625Wh batteries): 125 km

CAN YOU CHARGE THE BATTERY WITH IT BOTH ON AND OFF THE BIKE?

The battery can be charged directly on the bike or be removed and charged separately.

HOW LONG DOES IT TAKE TO CHARGE A TOTALLY DRAINED BATTERY?

The 500Wh battery takes approximately 6 hours for a full recharge.

WHY DO WE HAVE TWO DIFFERENT FRAME OPTIONS?

To give riders of all sizes the same performance and functionality we created step-through frames for the Precede:ON AL. The step-through frame makes mounting and dismounting the bike easy, even when it's loaded up with panniers or other supplies.

HOW MUCH WEIGHT CAN I PUT ON THE RACKS?

The rear rack holds 25 kg, while the optional front rack can carry 5 kg.

WHERE CAN PEOPLE BUY THE BASKETS FOR THE BIKE?

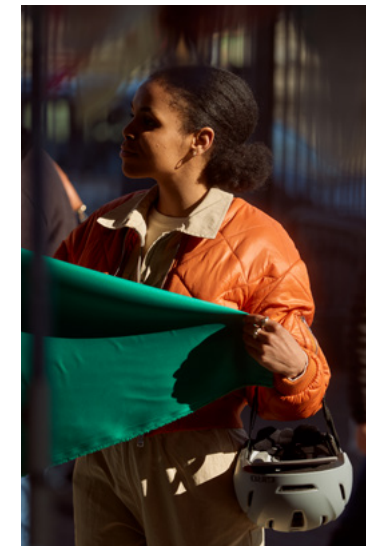

The custom baskets can be purchased on our website.

CAN I ADD A TRAILER?

Yes, by changing the rear axle for chain drive bikes or the left rear hub axle nut for belt drive bikes. We provide the parts required separately on the [canyon.com](https://www.canyon.com) webshop.

CAN I ADD A CHILD SEAT?

The Precede:ON does not officially support child seats.
