CREATIVITY UNLTD

Imagine liberating, autonomous, and uplifting movement without the weight of logistics.

Having full rein over your travel and state of mind.

Not just getting from A to B but turning transport into a special experience that transforms the everyday into the extraordinary.

Everyday errands shouldn't drain you.

Canyon e-city bikes are designed to inject such freedom into your schedule. Use them enthusiastically: drop your supplies in the panniers, catch the pastel-coloured sunrise, glide seamlessly past traffic and arrive elated. When whizzing through the urban jungle, you can seize every opportunity to tune in.

The day is yours.

There's no stopping you.

MOBILITY UNBOUND

Commuting the concrete jungle should be effortless.

That's why we designed the Commuter:ON 8 LTD to be compact and carriable with all the essentials to move fast in the city.

The Commuter:ON 8 LTD blurs the line between bike and e-bike. Weighing a lightweight 17 kg with an arsenal of practical city-friendly features, the Commuter:ON 8 LTD cleverly blends functionality and efficiency for a delightful result. The brand-new FAZUA Ride 60 drive system is something to shout from the rooftops: a powerful motor, preset riding modes and a customisable app set the bar for what lightweight urban e-bikes can be capable of.

Whether you're hopping on the train, nipping to the gym, or powering to work in the morning – the Commuter:ON 8 LTD liberates you to move through the urban jungle with zero limitations.

LOOK SHARP

TURN HEADS

You can tell it's a Canyon from a mile away – it's sleek, minimalist, and classy. Simply put, just a great bike. No fuss, no frills, just excellent design, functional adaptability, and ingenious engineering. Everything you need, and nothing you don't. Extremely light, the Commuter:ON 8 LTD's compact yet sturdy aluminium frame is equipped with a carbon fibre fork and a compact motor to save every gram. Ride it, transport it, lift it up and show it off – the Commuter:ON 8 LTD is meant to be taken everywhere with you.

Its low weight was achieved by our engineers looking individually at the bike's components – from the frame to the fenders – and optimising every detail. So you get a beautiful, powerful, and versatile e-city bike that you can still throw over your shoulder and carry up to your apartment for safe keeping.

PEDAL, EFFORTLESSLY

The Commuter:ON 8 LTD is outfitted with the gold standard when it comes to compact e-bike design: the FAZUA Ride 60 drive system. With a low volume and total weight of just 4.3 kg, it packs power while keeping the sleek, sporty Canyon bike feeling intact.

Engineered to seamlessly integrate with your riding style, the 430 Wh battery and 3 preset riding modes give you plenty of power while maintaining that light-touch feel. Whether it's a head start at the traffic lights or a leg-up on a steep incline with a pannier full of groceries, you'll get to your destination with ease. Walk Support means that cumbersome hill you dread on a hot summer's day is no longer a worry, either – just activate Walk Support mode on the cockpit for effortless uphill pushes.

CONTROL YOUR POWER

We heard you: put the remote on the top tube for easy access. When the remote is in sight, there's no need to reach towards the downtube in the middle of your ride.

Adjust your support level with 3 different-coloured preset riding modes:

- Breeze (green) for gentle, consistent tailwind, even with low pedaling power
- River (blue) to match your speed – the more pedal you give, the more support you get
- Rocket (red) for the most powerful push to effortlessly tackle those steep ascents.

PERSONALISE YOUR RIDE

By downloading and customising the FAZUA app, you get even more out of your rides. And with the smartphone mount in the middle of the cockpit, you have all your riding data securely in full view.

The app cleverly monitors your battery level and adjusts the support level to save on energy. Control the lights, adjust power or even activate rain mode for less sensitivity to avoid accidental mode changes: wherever you are, everything you need is right in front of your nose.

STUNNING DESIGN MEETS INTUITIVE FUNCTION

The Commuter:ON 8 LTD's innovative engineering is award-winning. And with good reason, too.

Riders can choose from two different frame designs: the Commuter:ON 8 LTD with an athletic, sporty silhouette, and Commuter:ON 8 LTD WMN with an angled top tube for a lower step-through height. The easy-install, secure SP Connect Smartphone mount is compatible with the Commuter:ON 8 LTD WMN, too – having your riding data in full view gives you even more control over your ride.

Thanks to internal cable routing, the cockpit is nice and tidy. The opening beneath the stem allows all cables to be fed into the head tube and flow through the frame. That means no getting cables caught on door handles or bike racks, too – it's not just a pretty face.

The cockpit is in a prime ergonomic position, giving more comfort to your wrists, less pressure on your arms and elbows and a better view of traffic – so riders can ride for longer. For a sportier, more streamlined riding position, the 10 mm spacer is easy to remove.

There's a reason that the Commuter:ON 8 LTD won the "Best of the Best 2022" Red Dot Design Award. This bike is excellently designed. Full stop.

THE STYLISH ALL-ROUNDER

By equipping the Commuter:ON 8 LTD with everything you need to sail the city streets, we've created a state-of-the-art bike that doesn't just look the part but plays the part, too.

SMART STORAGE

Workout gear, groceries, or your laptop – you decide. Just clip your panniers on, drop in your things and go.

The rear rack is compatible with practical, self-locking Ortlieb QL 3.1 bike bags for instant, simple pannier mounting and removal, and can hold a total weight of 15 kg.

STAY SAFE, STAY SEEN

When gliding through the city at night or in the rain, good lights are a must.

A Light Skin Ultra Mini is already integrated in the lower side of the cockpit, and a Supernova E3 Tail Light 2 is pre-fit onto the rear fender. Integrated lights mean you'll always ride safe without worrying about theft, spending money on battery replacement, or needing to take them inside and outside for charging.

Additionally, not only do the high-beam lights run from the bike's battery, the system also always reserves enough power for the lights – even when nearly out of charge.

SIMPLER CHARGING

The charging port is integrated on the bike, so you no longer need to fuss with battery removal: just plug in and charge. The FAZUA Ride 60 battery takes approximately 3.5 hours until it's fully charged again.

CLEVER CARGO

Just clip on your Croozer and bring your family with you.

It takes a matter of seconds to mount the Click & Crooz axle nut coupling adapter onto the Commuter:ON 8 LTD rear axle and convert your Croozer trailer into whatever transport solution you need. Super convenient, super durable and super sustainable.

IT TAKES TWO

Your bike, your way. The Commuter:ON 8 LTD comes as a single e-bike model with two different frame types. The only difference is the frame design.

The Commuter:ON 8 LTD lives up to our award-winning design language with its svelte, streamlined silhouette. The Commuter:ON 8 LTD WMN shares the same features and utilises an angled top tube to lower the stand-over height and make for an easier step-through. The result? A commuter bike that's simple to mount and dismount for all riders.

PUDDLES? NO PROBLEM

Arrive nice and clean, whatever the weather. The Commuter:ON LTD comes readily equipped with durable aluminium fenders, which perfectly complement the bike's sleek, fluent aesthetic. Oh, and no mud marks or splash back on your outfit either.

FAQ

WHEN DOES THE EMBARGO ON THE COMMUTER:ON 8 LTD EXPIRE FOR JOURNALISTS TO PUBLISH STORIES AND PHOTOS FROM THIS PRESS LAUNCH?

The embargo will end on **21 April 2022 at 11:00CEST**. After that, the bike will be visible on our website and journalists and media are encouraged to publish their stories and reviews. The Commuter:ON 8 LTD will be available for purchase in August 2022.

WHAT IS THE MAXIMUM AMOUNT OF WEIGHT I CAN PUT THE BIKE?

The maximum total weight (rider + bike + equipment) for the Commuter:ON 8 LTD is 130 kg.

WHAT IS THE MAXIMUM AMOUNT OF WEIGHT I CAN PUT ON THE REAR RACK?

The rear rack holds 15 kg.

CAN I MOUNT A TRAILER TO THE BIKE?

Yes. By changing the rear axle for chain drive bikes to the Croozer adapter (available on the Canyon website) you can add a trailer mount.

CAN I ADD A CHILD SEAT?

No, as we do not provide a warranty to add a child seat to the Commuter:ON 8 LTD.

HOW MANY KM CAN I RIDE ON A FULL BATTERY CHARGE?

You can ride an approximate maximum range of 130 km on the "River mode" preset.

Speed, terrain, and total weight (rider + bike + equipment) all influence the total range.

DO YOU HAVE TO TAKE THE BATTERY OUT OF THE BIKE TO CHARGE IT?

The battery can be charged directly on the bike or removed and charged separately. Removing the battery is easy – just slide it out from the bottom of the downtube.

HOW LONG DOES IT TAKE TO CHARGE A TOTALLY EMPTY BATTERY?

The 430Wh battery takes approximately 3.5 hours to fully recharge.

WHERE CAN I DOWNLOAD THE FAZUA APP?

The Fazua App is available for download in your smartphone's app store.

DO I NEED THE FAZUA APP TO USE THE BIKE?

You can ride the bike with or without connecting it to your smartphone.

HOW MANY MODELS ARE THERE?

The Commuter:ON 8 LTD will be available in one model, with two frame choices:

The Commuter:ON 8 LTD (step-over) and Commuter:ON 8 LTD WMN (step-through).

HOW MUCH DO THEY COST?

The Commuter:ON 8 LTD and Commuter:ON 8 LTD WMN cost €3,799*.

*This figure may vary from country to country.

WHAT SIZES ARE ON OFFER?

The Commuter:ON 8 LTD WMN is available in sizes S-L, and the Commuter:ON 8 LTD is available in sizes M-XL.
