# TREKKING: A NEW WORLD

Everyone loves an adventure. And unforgettable adventures are all about getting off the beaten track, getting into nature, and making memories that last.

Whether it's traversing miles of fire roads or making your way through epic urban landscapes. Cruising the flats or rolling over hills. Pulling a trailer or loaded up with pannier bags. No matter how, no matter where: those epic dawn-to-dusk rides are simply special. Pure Cycling in one of its purest forms.

That's why we're proud to announce a new bike in the Canyon line-up: a bike specially built for those unforgettable tours. Designed for adventure without limits. Our first-ever e-trekking bike.

CANYON

# EXTEND YOUR ADVENTURES

The Pathlite:ON is our first e-trekking bike – and it's a bike that offers limitless versatility.

Where, what, why we ride – we all have our own motivations. From city slicking to country cruising. From smooth asphalt to rough gravel roads. Weekend microadventures. Nursery runs with the kids. Or just getting out to enjoy the scenery. The Pathlite:ON is one bike for all your rides.

With its high-capacity batteries, the motor has a huge range. And combined with outstanding off-road performance, the Pathlite:ON is a truly state-of-the-art e-trekking bike.

# PATHLITE:ON

CANYON

# TOURING

We developed the Pathlite:ON to give riders unlimited freedom on their travels. A large battery capacity of up to 1,000 Wh makes covering big distances easy.

And even when things get steep, the BOSCH Performance CX motor gives you the extra power you need to keep effortlessly spinning up. On descents, hydraulic Shimano disc brakes provide consistent stopping power for ultimate control and safety.

The Pathlite:ON is also built to carry large loads. Simply clip a pair of pannier bags onto the rear rack, and pack in all your luggage. Then just attach your bottles and lock securely to the frame, and you're ready to roll.

And because maximum comfort is a must on long rides, we fit specially selected grips and saddles for optimal ergonomics.

## SUBURBAN COMMUTING

Cycling to the shops, to the café, to the office – with the Pathlite:ON, you can ride through any urban backdrop in style. And mudguards as standard mean you'll arrive at your destination clean and dry.

And when it's dark out, simply switch on bright Supernova lights: with their high beam function lighting the way home, you can go anywhere and stay safe in all conditions.

## FAMILY EXCURSIONS

The Pathlite:ON is ready for rides over any type of terrain, and over any type of distance – from short spins to all-day trips. You can even fit a kids' trailer and start a full family adventure from your front door. When it comes to ergonomics and functionality, the Pathlite:ON is a true standout.

# FEATURES & EQUIPMENT

With lights, a rear rack, mudguards, and the ability to mount a trailer, the Pathlite:ON is equipped for anything – from city streets to touring out in nature.

## GET ANYWHERE EASILY AND SAFELY

That's why the Pathlite:ON is the perfect choice for active families who want to get out and explore together. Even small children can join the ride, thanks to the bike's official approval for mounting Croozer bicycle trailers.

No matter whether you are travelling with the kids, pets, or just plenty luggage: the Pathlite:ON gives families the ability to reach any destination easily – and, and above all, safely.

## MOTOR

The new BOSCH Performance Line CX is the most powerful drive system ever fitted on a Canyon bike, and the current benchmark motor on the market. With the extra support that the BOSCH system provides, long touring rides stay fun – even in hilly terrain, carrying your heaviest gear.

 **BOSCH**

### MAXIMUM TORQUE

Light, compact, efficient, powerful: the high-performance BOSCH motor provides 75 Nm of torque for punchy acceleration, as well as lightning-fast response and smooth power delivery.

### MAXIMUM SUPPORT

With powerful, perfectly intuitive assistance of up to 340%, experience direct, dynamic response and huge power at your disposal. Even on long climbs, enjoy an extra boost up to 25 kph.

## BATTERY SYSTEM

BOSCH lithium-ion batteries are ultra-durable and highly efficient. Thanks to their enormous range, long service life and intelligent battery management system, they are among the most sophisticated available. Furthermore, their outstanding energy density allows for a compact, light design.

### INTEGRATED BATTERY

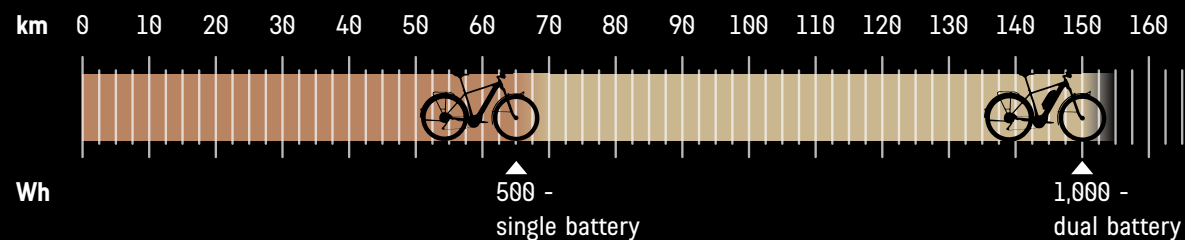

All Pathlite:ON models are fitted with an integrated 500 Wh Powertube battery. Thanks to the battery's sophisticated lithium-ion technology you can ride worry-free for mile after mile. An integrated mechanism keeps everything secure even over rough terrain, and the batteries can still be removed easily at any time.

### DUAL-BATTERY SETUP

To maximise the bike's range, the top Roadlite:ON models feature an extra external battery, for a huge 1,000 Wh total capacity. The battery management system intelligently switches between the two batteries during both charging and discharging. The system also protects against overcharging, undervoltage, overheating and short-circuiting, while also increasing battery lifespan. A dual-battery setup is the perfect solution for touring bikers, long-distance commuters and cargo cyclists.

### CHARGING TIME

Charge time to 50%: 2.5 hours. Time for total charge: approx. 6 hours.\*

\*Single 500 Wh battery with supplied BOSCH Compact Charger (2A) / 1,000 Wh dual-battery setup with supplied BOSCH Standard Charger (4A)

## LIGHTS

With the press of a button, switch between low beam and high beam modes so you can be seen in the city, and still get maximum illumination on dark gravel paths and cycle lanes. These lights aren't just bright: the wide-range beam gives you ultimate peripheral vision in all light conditions.

## DISPLAY

Pathlite:ON bikes are fitted with sophisticated handlebar-mounted BOSCH displays. Keep your hands on the bar at all times, and view all your important ride information with the flick of a thumb: current charge, speed, assistance mode, range, trip distance, and total distance. And when the terrain changes, switch between different assistance modes to get the support you need at all times.

## MUDGUARDS & REAR RACK WITH ORTLIEB QUICK-LOCK3.1 SYSTEM

Built for touring, Ortlieb's rear racks are a simple, set-and-forget way to transport big loads with ease – and with the Quick-Lock3.1 System makes attaching bags super-simple. Select between two mounting levels for maximum flexibility, and the integrated mudguards keep you dry in wet conditions.

## SUSPENSION FORK

With air spring technology and 100 mm of travel Suntour forks deliver outstanding comfort and precise handling, and let you float over ruts and rocks all day long. 34 mm thick stanchions and magnesium immersion tubes keep the weight low and strength high.

## GEARING

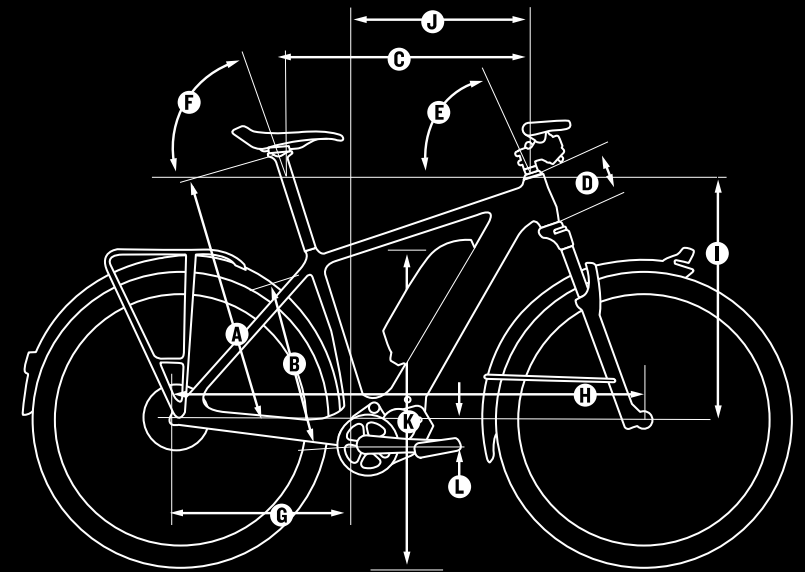

Pathlite:ON bikes come with Shimano XT and SLX components – parts that have proven themselves for decades in the mountain biking scene, and that simply raise the bar when it comes to quality. Unmatched in their simplicity and ergonomics, one-by drivetrain setups also provide outstanding power transfer, increased shifting efficiency, and reliable performance in a wide range of riding scenarios.

## BRAKES

When you have a motor like the BOSCH Performance putting down the power, you need a strong, reliable pair of brakes to match: that's why all Pathlite:ON models have Shimano hydraulic brakes. Large rotors provide optimal performance, huge power, and precise modulation in all conditions – and ergonomic 3-finger levers stay comfortable all day long.
