FREEDOM UNLTD

**HOLD ONTO YOUR HATS.
THE SHOWSTOPPER HAS ARRIVED.**

Imagine this: an elegant, light-as-you-can-get, svelte carbon frame designed for agile adventures and city slicking. Throw in a sporty hybrid bike feel, wrap it up with an all-in-one cockpit and boom: you've got the eye-catchingly charismatic Roadlite:ON CF 9 LTD.

And it's as versatile as can be. Jan Frodeno, the German triathlete and 3-time Triathlon World Champion, loves zipping around on the bike for everyday errands, take-outs with friends, or sunset spins to decompress. It's built for seamless everyday use. Like Jan, you can keep it by the front door to easily grab it whenever you need it.

Glide up the hills. Catch the sunsets. Dismount with positive energy.

There's a feeling of freedom in every ride.

NIMBLE, SLEEK, AND POWERFUL

Lighter than anything in its class, the limited-edition Roadlite:ON CF 9 LTD is a flat-bar hybrid bike that embodies elegance, speed, and stunning aesthetics.

It sets the benchmark for innovative development and engineering. For the first time ever, the new member of the Roadlite:ON family has a carbon fibre frame, uniting speed with everyday ease-of-use. This is as smart as e-bike design gets.

Using an e-bike for workouts is no oxymoron, either – while it may seem like buying a top-quality chef's knife to stir soup, keep an open mind. The natural-feel, non-invasive power from the all-new FAZUA RIDE 60 motor lets you cruise nice and easy, and still get a heart-pumping workout when the mood takes you.

And with a total weight of just 4.3 kg, the FAZUA RIDE 60 drive system sets the bar for light-weight e-bike design. The 430 Wh battery and 3 preset riding modes seamlessly integrate with any riding style and maintain that agile, light-touch Canyon bike feel whilst still packing a decent punch. Riders can download the FAZUA app to get even more out of their rides: by creating a custom profile, it's possible to:

- customise the motor to your riding style
- get over-the-air updates
- connect to your compatible GPS bike computers via Bluetooth.

Full connectivity.

UNRIVALLED CARBON ENGINEERING

Featuring Magura MCi hydraulic disc brakes, mega bright 150-lumen front lights and a speed-responsive taillight, the FAZUA RIDE 60 drive system, a carbon aero seatpost, and SRAM Eagle AXS wireless electronic 12-speed gearing.

You're looking at the bike that will set the standard for the future of Canyon hybrid bike design.

The Roadlite:ON CF 9 LTD weighs only 14.45 kg, thanks to its carbon fibre frame. Such a low weight is impressive for a e-bike. It was achieved through a process of Finite Element Analysis, where our engineers look individually at the bike's components and optimise every detail.

For example, the size M bike frame weighs only 1550 g. The fork, handlebar, and seat post only add an extra 2.5 kg, leaving loads of room for functional add-ons. The result? A bike that you can still carry up to your apartment or down the steps on that shortcut to work. Ride it, transport it, lift it up and show it off – it's meant to be taken everywhere.

INGENIOUS DESIGN

A CLEAN, CLEAR COCKPIT

Our one-piece carbon cockpit weighs just 332 g and combines the stem and handlebar into one sleek, single unit. For those wanting an even sportier position, the removable 10 mm spacer allows for easy height adjustment.

The disc brake cables, the light cables at the front and rear, and the remote are all invisibly routed in the cockpit. No dirt build-up. With the Magura hydraulic disk brakes, we were able to go a step further – even the lever mounting is integrated into the handlebars. The reduced visual clutter gives a stunningly fluid design language from the tip to the tail.

The cockpit also has an integrated hidden interface to set up the SP Connect smartphone mount, which is delivered in the accessory box. Just get the compatible smartphone case for your phone, and you can securely mount it on. No worries about bumpy paths knocking your phone out of its case as the SP Connect smartphone mount is mega secure. Use your favourite fitness tracking and navigation apps, and even charge your phone as you ride with the clever USB-C charging port.

WRIST-FRIENDLY

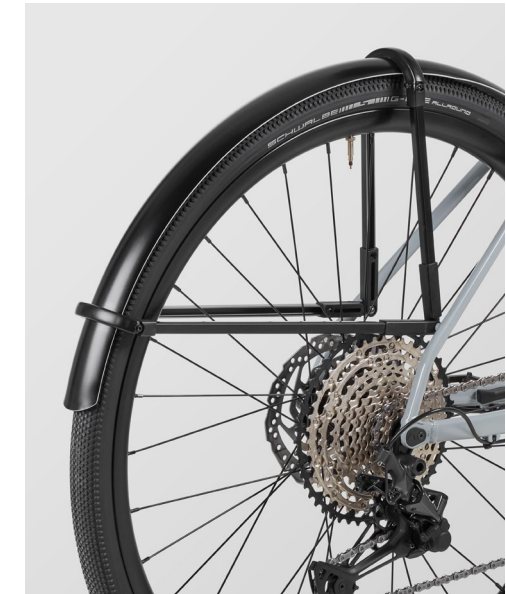

An ergonomic design reframes the focus to what really matters: a comfortable ride. The cockpit was developed in-house at Canyon with wrist-friendly grips and easily reachable shift and brake levers. The flat bar position is as sporty yet slightly more upright, so your neck won't feel strained on longer rides.

SMOOTHER MOVEMENT

Because the seat stays join the seat tube further from the saddle, there's more room to flex. More flex means noticeable comfort whenever the city streets present you with potholes. The saddle clamp is integrated for the chef's kiss to the frame design.

Above the clamp, the lightweight carbon aero seatpost gives the right balance of durability, and stiffness. It discreetly absorbs vibrations and bumps for a smooth, stable ride.

CUSTOMISABLE CLEANLINESS

Finally, there are attachment points for Curana fenders at the front and rear. Choose to buy and mount the fenders to keep mud splatters at bay in case of sudden showers – or go for none if you like the minimalist finish.

ON THE MOVE

Like a finely tuned athlete, the Roadlite:ON CF 9 LTD carries everything you need and nothing you don't. Of course, no-one is stopping you from getting extra accessories, like Curana fenders or a Croozer trailer.

OVER-THE-AIR SHIFTING

Originally developed for world-level racing, the Eagle AXS 12-speed wireless electronic gearing is one of SRAM's most durable, precise, and fastest shifting groupsets. Ever. The 1x12 drivetrain uses a 10-51 cassette – and with an impressive

510% gear range, you have enough gears for the steepest hills. Changing gears is as smooth as switching up the volume on the radio. And charging them? Super easy: just remove the little batteries and power them up with the charging box included.

LASTING LUMINOSITY

For the first time ever in the Roadlite:ON family, the Roadlite:ON CF 9 LTD comes with a frame-integrated light system.

They're mega bright, mega powerful, and smart as well as safe. No larger than a €1-coin, the 150-lumen LightSKIN Ultra Mini sits right in the centre of the handlebars. It gives brilliantly bright peripheral vision, letting you ride safe even on dark cycle lanes in the rain.

On the back, the bright red Supernova TL3 PRO is made of high-tech scattering material. This gives an impressive warning effect visible

from all sides. The cool thing is that it increases in brightness when you squeeze the brakes. If you suddenly slam hard on the brakes, it pulses at maximum luminosity. Its smart positioning directly below the saddle guarantees you'll always be seen, since the rear wheel will never block the light.

And? You never have to fumble around with the lights before and after your ride. Both are completely integrated into the bike frame, protecting them from light-fingered theft.

Simply put, the Roadlite:ON CF 9 LTD is design excellence embod-

ied. No fuss, no frills, just head-turning design, functional adaptability, and skilful engineering. You can tell it's a Canyon bike from a mile away: it's elegant, minimalist, and classy. Who said that focussing on versatility means you scrimp on aesthetics?

FAQ

WHEN DOES THE EMBARGO EXPIRE ON THE ROADLITE:ON CF 9 LTD SO THAT JOURNALISTS CAN PUBLISH STORIES AND PHOTOS FROM THIS PRESS LAUNCH?

The embargo will end on **2 March 2023 at 11:00 CEST** when the bike becomes available on our website. After that, journalists and media are encouraged to publish their stories and reviews.

WEIGHT AND STORAGE

WHAT IS THE MAXIMUM AMOUNT OF WEIGHT I CAN PUT THE BIKE?

The maximum total weight (rider + bike + equipment) for the Roadlite:ON CF 9 LTD is 130 kg. If you attach the Croozer trailer, you can carry an additional 50 kg.

CAN I MOUNT A TRAILER TO THE BIKE?

Yes. By changing the left rear hub axle nut to the Croozer adapter (available on the website) you can add a trailer mount.

CAN I ADD A CHILD SEAT?

It is not possible to add a child seat to the Roadlite:ON CF 9 LTD.

CAN I MOUNT MUDGUARDS?

Yes. You can purchase the compatible fender set available on the Canyon online store.

BATTERY, DISPLAY AND RANGE

HOW MANY KM CAN I RIDE ON A FULL BATTERY CHARGE?

You can ride a range of up to 120 km in River, the lightest support mode. Speed, terrain, and total weight (rider + bike + equipment) all influence the total range.

DO YOU HAVE TO TAKE THE BATTERY OUT OF THE BIKE TO CHARGE IT?

It's your choice: charge the battery directly on the bike or remove it and charge it separately. To remove the battery, just remove it from the downtube.

HOW LONG DOES IT TAKE TO CHARGE AN EMPTY BATTERY?

The 430 Wh battery takes approximately 3.5 hours to fully recharge.

WHICH SMARTPHONES CAN YOU MOUNT ON THE COCKPIT?

Any smartphone is compatible with the mount. Just make sure you have the correct SP Connect case for your phone model.

WHERE CAN I GET THE FAZUA APP?

You can download the FAZUA app in your smartphone's app store.

DO I NEED THE FAZUA APP TO RIDE THE BIKE?

No, you can ride the bike without connecting it with your smartphone.

WHY DOES THE ROADLITE:ON CF 9 LTD USE THE FAZUA RIDE 60 DRIVE SYSTEM?

The FAZUA RIDE 60 drive system balances smooth power, compact design, lightness, and non-obtrusive pedal assist as harmoniously as we could have imagined for the bike.

SIZING AND PRICING

HOW MUCH DOES IT COST?

The Roadlite:ON CF 9 LTD costs €4,999.

WHAT SIZES ARE ON OFFER?

The Roadlite:ON CF 9 LTD is available in sizes S–XL, covering riders of 156–205 cm tall.

WHAT'S THE MAXIMUM TIRE CLEARANCE?

The Roadlite:ON CF 9 LTD has clearance for 40 mm tires.
