Introducing the Pathlite:On Superlight

The PATHLITE:ON SUPERLIGHT is a lightweight e-touring bike equipped with everything you need for leisurely, joyful adventures on two wheels. In short: an e-bike that fully embraces the spirit of RIDE UNLTD.

Whether you're exploring unpaved paths, experiencing blissful rides deep in nature, or cruising through your daily suburban commute, the PATHLITE:ON SUPERLIGHT is a bike you can rely on to get it all done with total ease.

Our goal is to inspire you to move with autonomy and freedom, turning everyday trips into adventures – all thanks to the bike's brilliant functionality, premium quality and reliability, and unbeatable value.

The all-new lightweight Bosch SX system, with advanced Smart System connectivity sets the standard for compact, powerful e-bike drive systems, striking the perfect balance between high power and low weight. The child seat-compatible MIK HD rear rack and plentiful extra cargo options give you incredible flexibility to run errands big or small.

An all-round e-touring bike that does it all, does it well, and does it fast.

This is the PATHLITE:ON SUPERLIGHT.

**RIDE UNLTD
ADVENTURE UNLTD**

The all-New Bosch SX drive system

The new PATHLITE:ON SUPERLIGHT is equipped with the all-new Bosch SX drive system – a motor engineered to hit the sweet spot between power and weight, all whilst delivering smooth, natural-feeling tailwind support that's fun, engaging, and fast.

With 600 W of peak power and 55 Nm of torque, you get plenty of support to cruise up steep streets with full panniers. The system provides more support the faster you pedal – one of the most controlled, dynamic, and grin-inducing e-bike motors Bosch have ever made.

Its small form factor also contributes to a beautifully sleek, elegant look – the PATHLITE:ON SUPERLIGHT has the kind of style and panache you just don't see on other e-touring bikes in its class.

CompactTube 400 Battery

Slim, compact and light, the 400 Wh battery is the perfect addition to the SX drive system. A sleek downtube with plenty of battery capacity for any kind of exploring you set your mind to. Range is dependent on the ride mode, the rider and the environment, but with up to about 85 km of range you can be sure you'll have the juice to get the job done.

PowerMore 250 range extender

Longer adventures, overnights in the woods or just wanting more? The 250 Wh Range extender is the size of a bottle and weighs just 1.5 kg. The added battery gives you an amazing 650 Wh of combined battery capacity. Nothing can hold you back now!

Smart technology

Bosch Smart System

Download the Bosch eBike Flow app, connect your smartphone to your bike using Bluetooth, and unlock a range of brilliant smart features to expand your limits even further:

- eBike Lock
- Navigation
- Over-the-air system updates
- Set up individual ride modes
- Activity tracking (with the possibility to connect with other apps, e.g. Apple Health, Komoot, Strava)

For added anti-theft security, the PATHLITE:ON 6 and 8 SUPERLIGHT come with the Bosch Connect Module. This enables a movement activated anti-theft alarm and GPS tracking through the app when your bike is moved when locked.

Everything in plain view

With the new Bosch Purion 200 display you have all your key metrics available at a flick of your thumb. Press the remote and to view any information you would like to see on the clear and bright colour display. If you want to use your smartphone as an extra ride display or to navigate with, just twist and lock it onto the bike's pre-installed SP Connect handlebar mount (phone case not included).

Bring all your precious cargo

MIK HD rear rack

Experience freedom on two wheels wherever you want, with whoever you want – the PATHLITE:ON 4 and 6 SUPERLIGHT are equipped with the versatile MIK click system.

HD means Heavy Duty and means that as well as the usual baskets and bags, the rack is also tested and certified to attach a child seat too.

The rack is also equipped with the MIK Studs on the sides, which are compatible with Ortlieb's ingenious QL 3.1 secure rapid mounting system. So whether it's one of your kids, a picnic, or any other adventure supplies, you'll be able to safely transport it all in confidence.

Top tube mounting point

For small supplies you want to have within easy reach, just attach our own Canyon top tube bag.

Trailer compatible

Widen your scope for adventure even further and attach a Croozer trailer to the rear. Just add the Croozer trailer adapter and pull up to 50 kg extra.

Discover more

Grippy Tires

Ride safe and confident with huge grip and traction even in challenging weather conditions – Schwalbe G-One Ultrabite tyres are perfectly capable on all gravel roads, forest paths, and light cycling trails.

See and be seen

The PATHLITE:ON 4 and 6 SUPERLIGHT are both equipped with bright lights that illuminate the road ahead and ensure other road users see you coming at any time of day. The entry level spec uses an efficient Iridium LED Shiny 40 front light.

On the PATHLITE:ON 6 SUPERLIGHT you'll get the brilliantly bright Supernova Mini 2 Pro. It also comes with a button to turn on your high beam for complete visibility during nighttime adventures in the hills.

Both come with rear lights elegantly integrated in the rear rack.

Stay clean

Don't let anything stop you from exploring your favourite places. The PATHLITE:ON 4 and 6 SUPERLIGHT come with front and rear fenders to keep you dry and clean no matter the weather.

Explore your way

Sunrise adventures to the lake, cycling to your cabin in the woods. The PATHLITE:ON SUPERLIGHT is engineered to take you to new places with ease.

Choose your frame

Your style, your frame. All PATHLITE:ON SUPERLIGHT models are available with two frame variants. If you prefer a slightly lower top tube for effortless mounting even with a child seat attached to the rear, pick the mid-step frame. Value classic, bold aesthetics? Go with the step-over frame.

Fits like a glove

The PATHLITE:ON 4 and 6 SUPERLIGHT come with 6 cm of handlebar height adjustment. From low and sporty to upright and confident, the choice is yours.

Comfortable ride

The dropper suspension seatpost on the PATHLITE:ON 6 SUPERLIGHT smoothens out your ride on the harshest terrain and also conveniently lets you drop the saddle for easier mounting, more confidence in stopping and putting your foot down, and more room for movement on descents.

For an extra measure of hand comfort and front-wheel grip off the beaten path, the PATHLITE:ON 4 and 6 SUPERLIGHT come equipped with 63 mm Suntour suspension forks as standard.

CANYON PATHLITE:ON SUPERLIGHT

Canyon's lightest E-touring bike

The PATHLITE:ON 8 SUPERLIGHT is the lightest bike in the lineup, equipped with a lightweight carbon fork and the innovative CANYON VCLS CARBON SEATPOST, delivering 20 mm of flex to absorb road buzz and boost riding comfort.

The combination of the compact Bosch SX drive system and lightweight components result in an overall weight of only 17 kg – e-touring bikes don't come more agile than this.

No rack, no problem

The rigid fork has eyelets for mounting our own CANYON FORK CAGE – ideal for carrying extra luggage. Simply screw the cage onto the fork, and add your bags. Job done.
