

CUBE NUROAD HYBRID

C:62 RACE 400X

One look at the Nuroad Hybrid C:62 Race and you know that this is a special bike. But the elegant, organic curves of its C:62® carbon frame are just part of the story, because at the heart of this gravel-devouring machine is Bosch's new, lightweight SX motor – around 800g lighter than the Bosch CX and with 55Nm of torque – and 400Wh battery. And, if that doesn't give you the range you're looking for, it's PowerMore-ready for an extra 250Wh of juice. Shimano's GRX 1x12 gears with matching GRX hydraulic disc brakes put you firmly in control, whilst a pair of Newmen Performance X.R.25 wheels shod with grippy Schwalbe 45mm tyres keep the rubber side down and moving forward, wherever you're headed. It's ready. Are you?

CUBE NUROAD HYBRID

C:62 RACE FE 400X

Lightweight Bosch hybrid technology, elegant carbon frame aesthetics and the practicality of mudguards and a luggage carrier come together in the Nuroad Hybrid C:62 Race FE. The full carbon fork is carrier-ready too, and there's more than enough room for the 45mm Schwalbe tyres – you can fit up to 50mm – even with the included mudguards. Bosch's new lightweight SX drive system – which saves around 800g over the CX unit – is paired with a 400Wh battery, and the frame is PowerMore-ready for an additional 250Wh of range. Rugged and light Newmen wheels are kept in check with Shimano's powerful GRX hydraulic disc brakes, while drive is transferred with wide-ranging Shimano GRX 1x12 gears. Whatever bikepacking adventure you have in mind, this bike is ready.

CUBE NUROAD HYBRID

C:62 SLX 400X

There's a lot more to the Nuroad Hybrid C:62 SLX than its light, tough and beautifully sculpted C:62® carbon frame and full carbon fork. For starters, we fitted Bosch's new lightweight SX drive unit and a 400Wh battery, which together deliver up to 55Nm of torque as well as a significant weight saving. For longer days out the frame is PowerMore-ready for an extra 250Wh of energy – and rack mounts front and rear give you the option of carrying everything you need with you. Sram's GX Eagle Transmission 1x12 gears deliver a huge gear range, exceptional ruggedness and flawless electronic shifting. Powerful Sram Rival AXS hydraulic disc brakes keep your speed in check via light, tough Newmen Evolution SL X.R.25 wheels and grippy, comfortable Schwalbe G-One Bite 45mm tyres. And, even with optional mudguards fitted, there's room to run tyres up to 50mm. Where to next?

CUBE NUROAD HYBRID

C:62 SLX FE 400X

Pack up what you need and head off into unknown territory with the Nuroad Hybrid C:62 SLX FE. We fitted mudguards and a luggage carrier, so you're all set for any bikepacking adventure. The lightweight Bosch SX drive and 400Wh battery – with optional PowerMore 250Wh booster pack – are neatly incorporated into the svelte C:62® carbon frame. We chose Sram's GX Eagle Transmission with 12 gears for its huge range, durability and super-precise electronic shifting. Newmen Evolution SL X.R.25 wheels and Schwalbe G-One Bite 45mm tyres combine great grip, toughness and low weight. And Sram's powerful Rival AXS hydraulic disc brakes ensure you're always in full control.

CUBE NUROAD HYBRID

C:62 SLT 400X

Details matter. We know that. It's reason that the Nuroad Hybrid C:62 SLT features Continental Terra Speed 45mm tyres and Newmen Advanced SL X.R.25 carbon wheels, because low rolling weight and exceptional grip are differences you can feel. But the big picture matters too, and that's why we built the C:62® carbon frame around Bosch's new, lightweight SX drive system and 400Wh battery. With up to 55Nm of torque, lighter weight and the flexibility to add a PowerMore 250Wh booster battery, it's got the performance you need. Sram's XX/XX SL Eagle Transmission 12-speed gears combine toughness with exceptional electronic shifting accuracy. And Sram Force AXS hydraulic disc brakes ensure you can always slow and stop safely, whatever the conditions. We took care of it all, so you can just ride...
