

# Three CUBE and Acid top products best in test

No fewer than three products from CUBE and Acid have recently been tested as best in various magazines. The CUBE Compact Hybrid, CUBE Litening C:68X Race and the Acid Pro 80 Frontlight win the race from other brands.

## 1: CUBE Compact Sport Hybrid

The latest issue of MY BIKE magazine (01/2023) rates the CUBE Compact Sport Hybrid best value for money in the test "Mini rocks - Small tyres and great fun"!

**Verdict:**

*"The CUBE frame is similar to the i:SY E5, and the riding characteristics are similarly quick and agile. [...] You get some relief from the pleasantly cropped handlebars with ergo grips. The CUBE has a Speedlifter stem with twist function, which means you can turn the bars 90 degrees to save space and easily adjust the height with a quick release. The long extendable seat post makes it suitable for a lot of different rider heights. If you only have limited storage space, you can add folding pedals. With the bars tucked away you can easily store the Compact Sport in a narrow hallway."*

## 2: CUBE Litening C:68X Race

The **Litening C:68X Race** wins the test "Against the wind - Race bikes under 5.000 euros" in the latest issue of TOUR magazine (01/2023) before other brands like Storck, Canyon, Giant, Merida, Rose, Benotti, Ridley, Cervelo and Lapierre.

**Verdict:**

*"Uncompromising lines: If you're looking for as much aero speed as you can get – for as little money as possible – look no further than this year's 2023 CUBE Litening Aero. The bike is not only unrivalled in terms of price and performance, but even outshines models from big mail-order brands like Canyon and Rose. If properly assembled, it is competitively light and one of the fastest rides in its class."*

### 3: Acid Pro 80 Frontlight

The ACID Frontlight Pro 80 wins best in test in the latest test of front lights of Roadbike magazine (10/2022) before other brands such as Trelock, Sigma, Litecco, Lezyne, Cateye, Axa, Busch&Müller, Knog, Trelock and VDO.

**Verdict:**

*"The ACID (CUBE's own brand) packs in a surprising array of really useful features: Like the screw clamp that allows it to be mounted out front and centre where you get the full benefit of the already great beam spread. It comes in at a very reasonable weight and the long burn time is fantastic! The outright test winner!"*
