

NEWMEN INTRODUCES NEW PHASE CARBON HANDLEBARS FOR MTB

NEWMEN expands its portfolio with the new PHASE carbon handlebars. The range has been developed for all mountain biking disciplines, from cross-country (XC) to downhill (DH). With different versions designed for a variety of riding styles and terrains, NEWMEN offers a versatile handlebar range for mountain bikers.

The PHASE handlebars are available in different widths and rise options, with clamp diameters of 31.8 or 35 mm. They are also available with or without the innovative VariGrip System. Starting at just 166 g, the range offers a lightweight solution for a wide variety of MTB applications. To ensure performance and reliability, NEWMEN has extensively tested the new carbon handlebars both in its in-house testing laboratory and out on the trails.

Refined design & geometry

Like the aluminium BESKAR and PERFORMANCE handlebars, the PHASE range is based on NEWMEN's proven handlebar geometry. The subtle design ensures the handlebars integrate seamlessly with a wide variety of mountain bikes.

VariGrip System: adjustable handlebar width

The PHASE range is available with the VariGrip System (VGS). This allows riders to adjust the handlebar width precisely within seconds, without having to cut the handlebars. The width can therefore be easily adapted to suit individual riding styles and terrain.

Technical specifications

Intended use: XC to DH

Material: Carbon

Clamp diameter: 31.8 mm / 35 mm

Weight: Starting at 166 g

Width: 760 mm (XC-Trail) / 800 mm (Enduro-DH)

Width with VGS: 710–760 mm (XC-Trail) / 760–810 mm (Enduro-DH)

Rise: 10, 25 or 40 mm

Backsweep / upsweep: 8° / 8°

Maximum system weight: No limit

Pricing and availability

The PHASE XC-Trail is available from **20 October 2026**, with the PHASE Enduro-DH following on **15 December 2026**. Depending on the model, recommended retail prices range from £149.95 to £165.00

NEWMEN: from the Allgäu to the world

NEWMEN is a German manufacturer of high-quality bicycle components, founded in 2016 and based in the Allgäu region. The brand develops lightweight, innovative and durable components for various cycling disciplines, with a strong focus on quality and performance.

All components undergo extensive testing in the company's in-house testing laboratory, according to standards that exceed legal requirements. The company is fully independent and owner-managed. This independence enables quick decision-making, a long-term vision and a consistent focus on product development, with quality, innovation and performance at its core.
