

# XPENG G6

## ULTRA SMART COUPE SUV

### Feature Highlights

**Rapid Charging & Super Fast Charging:**  
Equipped with advanced 800-volt technology. With G6, go from 10% to 80% battery in just 12 minutes, saving you time and keeping you on the road. Enjoy longer drives with fewer stops for charging.

**Luxurious Equipment & Design:**  
Experience luxury with the G6's lavish standard equipment. With 20-inch and 18-inch wheels paired with Michelin tires, provide the users comfortable experience. Immersive entertaining experience in 960W, 18-speaker audio system.

**Latest Generation EV Platform SEPA 2.0:**  
The G6 is built on XPENG's latest generation EV platform SEPA 2.0. The lighter weight can provide the customer the longer range, also torsional rigidity, an 83% increase in stiffness compared to our previous designs. Over 300 parts are integrated into one, for greater impact resistance, better weight management, and better protection.

**Cell-integrated Bodywork:**  
The battery is integrated as a fixed part of the platform. A 3-layer crash structure helps protect the battery, and the side pillar can withstand pressure up to 80 tons. With this design, it achieves a vertical space saving of 5%, offering a better driving experience and a more spacious cabin.

**Maximum Energy Efficiency:**  
XPENG G6's heating system X-HP3.0 Heat Pump is designed for maximum energy efficiency. Customers can travel comfortably regardless of the temperature outside.

**Spacious & Comfortable:**  
With a wheelbase of 2.89 meters and smart interior design, it provides plenty of legroom and headroom. With a luggage compartment of 571 liters of storage space and expandable 1,374 liters when the rear seats are folded, it has enough spaces for customers to take most things with them on the trip.
