XPENG L05: Intelligent Family SUV of the Next Generation

- New family SUV makes its debut in China and will arrive in Europe in early 2027
- Self-developed AI technology for a safe and relaxed driving experience
- All details on the Europe launch at the Brussels Motor Show in January 2027

▲ XPENG L05

München/Samstagern, 30. Oktober 2026 – XPENG continues to expand its model range: the new XPENG L05 (the vehicle is not yet on sale, and the final consumption and emissions figures will be announced at a later date) made its official debut in China. The spacious family SUV combines state-of-the-art artificial intelligence (AI) with plenty of space and high everyday practicality – and is set to complement the Chinese high-tech brand's offering in Europe in the future. XPENG will announce all details on the market launch in Switzerland at the Brussels Motor Show, which takes place from 8 to 17 January 2027.

Intelligent technology for relaxed driving

The XPENG L05 incorporates XPENG's latest developments in the field of physical AI – that is, artificial intelligence – which perceives its surroundings and applies them in the real world. At its core is XPENG's self-developed AI chip, "Turing". Together with the in-house VLA 2.0 operating system, which links camera images, language understanding and driving decisions, the Turing chip forms the basis for the XPENG L05 to capture its surroundings in real time, classify traffic situations and respond accordingly. In this way, the family SUV contributes to a safer, more relaxed and more intuitive driving experience.

Plenty of space for the whole family

In the model range, the XPENG L05 is positioned above the SUV coupé XPENG L03 (combined energy consumption 15.3 - 18.4 kWh/100 km; combined CO_2 emissions 0 g/km; energy efficiency category: B/C, combined values according to WLTP, subject to final homologation). The five-seater is aimed at families that value generous space, high comfort and plenty of flexibility. True to the guiding principle "Space for Life", the SUV adapts to a wide variety of everyday situations – whether on the daily school run, while shopping or on a weekend trip.

"With the XPENG L05, we are showing how we imagine family mobility of the future: it combines intelligent technologies with plenty of space and the flexibility that modern families need in everyday life," explains Markus Schrick, Managing Director of XPENG sales region Central Europe. "We look forward to announcing further details on the market launch in Europe at the Brussels Motor Show 2027."

European premiere at the Brussels Motor Show

XPENG will present all details of the European version of the XPENG L05 in January at the Brussels Motor Show, including:

- Technical specifications
- Equipment for the Swiss market
- Powertrain variants
- Scope of functions of the intelligent driver assistance system

- Intelligent technologies on board
- Prices and exact market launch

About XPENG

XPENG (NYSE: XPEV and HKEX: 9868) is a leading electric vehicle company headquartered in Guangzhou, China, with offices in the US and Europe. The company is committed to advancing the transformation of smart EVs through technology and shaping the mobility experience of the future. To enhance its customers' mobility experience, XPENG develops in-house comprehensive technologies for advanced driver assistance systems and intelligent in-car interfaces, as well as core vehicle systems including the powertrain and the electrical/electronic architecture. Among others, the Volkswagen Group holds a 5 percent stake in XPENG (worth 700 million euros) to jointly develop electric vehicles under the VW brand for the Chinese market.
