Garage Jüni is new XPENG partner in the Bern area

- Locally rooted: High-tech automotive brand enters family business
- Expanding model range: SUV coupé LO3 and luxury van X9 complement the trio
- Expansion: XPENG and Hedin Distribution in Switzerland on a growth path

▲ Diego Battiston (CEO Hedin Distribution AG), Michel Jüni (Managing Director Garage Jüni AG), Marcel Zaugg (Sales Manager Garage Jüni AG), Massimo Redigolo (Head of Aftersales XPENG CH)

Samstagern, 27 August 2026 – Garage Jüni is powered up: The long-established family business is now selling models from the Chinese high-tech brand XPENG. As an official contract partner in the greater Bern area, the company is showcasing its expanding product range – including the option of fully electric test drives. This makes the smart mobility of the future tangible on site.

The name says it all: Benz Jüni turned his passion into a profession and founded his own company in 1972. Since then, Garage Jüni, which has now grown to 15 employees and is run

by Michel Jüni in the second generation, has been a fixture and a reliable partner – and since 1 August 2026 also for XPENG. The showroom in Rosshäusern at Stationsstrasse 8, measuring around 180 square metres, provides the right setting for the model range.

Among the models on display are the XPENG G6 SUV coupé (power consumption 16,8 – 18,4 kWh/100 km; CO₂ emissions 0 g/km; energy efficiency category: B/C, combined values according to WLTP), the flagship XPENG G9 SUV (power consumption 19,4 – 21,3 kWh/100 km; CO₂ emissions 0 g/km; energy efficiency category: C, combined values according to WLTP), the sporty XPENG P7+ family saloon (power consumption 15,2 – 17,4 kWh/100 km; CO₂ emissions 0 g/km; energy efficiency category: B/C, combined values according to WLTP), as well as the seven-seat luxury van X9 (combined energy consumption 20,2–20,8 kWh/100 km; combined CO₂ emissions: 0 g/km; energy efficiency category: B – combined values according to WLTP subject to final homologation), which is now configurable.

The four models are based on a state-of-the-art 800-volt charging architecture, combined with the industry's first 5C LFP high-voltage battery. In the interests of sustainability, the lithium iron phosphate battery does without rare minerals such as cobalt, manganese and nickel, without compromising performance. With ranges of up to 615 kilometres (WLTP combined for XPENG X9 FWD Long Range), the quartet offers exceptionally high charging performance: the XPENG P7+ charges at up to 446 kW, the XPENG G6 at up to 451 kW, the XPENG G9 at up to 525 kW and the XPENG X9 at up to 542 kW – all top figures in the industry. This means the batteries can be charged from 20 to 80 percent in just ten minutes.

Another AI-defined vehicle will soon follow with the XPENG LO3 SUV coupé (combined energy consumption 15,3 – 18,4 kWh/100 km; combined CO₂ emissions 0 g/km; energy efficiency category: B/C, combined values according to WLTP, subject to final homologation). As an entry-level model measuring 4.65 metres in length, it paves the way into electric mobility. Sporty design, the brand's typically extensive equipment and advanced assistance systems meet various battery and drive variants with a range of up to 520 kilometres (WLTP combined for XPENG LO3 RWD Long Range). Deliveries will begin in the fourth quarter.

Voices on the partnership

“XPENG is one of the most exciting and advanced automotive brands in the world: its versatile models combine extensive standard comfort and safety equipment with smart technologies and a powerful electric drive offering everyday range and ultra-short charging times. I am delighted that we will now be able to present and sell these vehicles as an official contract partner,” says Michel Jüni, Managing Director of Garage Jüni.

“With Garage Jüni, we have gained a long-established partner business in the Bern area. This means we can present the versatile XPENG model range to even more customers – without long journeys, in an appropriate setting,” explains Diego Battiston, who leads XPENG’s business in Switzerland as CEO of Hedin Distribution AG (Swiss importer). “As XPENG continues its expansion and brings further models to Switzerland and Europe in the coming months, a broad partner network is of central importance to ensuring sustainable success.”

Expansion of the XPENG partner network

With a view to further expansion in Switzerland, XPENG is actively seeking additional sales and service partners. Interested companies that would like to help shape the future of electric mobility with us are welcome to contact us by email at xpeng@hedindistribution.ch with the subject line “New contract partner”.

About XPENG

XPENG (NYSE: XPEV and HKEX: 9868) is a leading electric vehicle company headquartered in Guangzhou, China, with offices in the US and Europe. The company is committed to advancing the transformation of smart EVs through technology and shaping the mobility experience of the future. To enhance its customers' mobility experience, XPENG develops in-house comprehensive technologies for advanced driver assistance systems and intelligent in-car interfaces, as well as core vehicle systems including the powertrain and the electrical/electronic architecture. Among others, the Volkswagen Group holds a 5 percent stake in XPENG (worth 700 million euros) to jointly develop electric vehicles under the VW brand for the Chinese market.
