

SCARPA PRESENTS RIBELLE CROSS 2: THE NEW HIKING SHOE DESIGNED FOR AGILE MOVEMENT ACROSS MIXED TERRAIN.

A dynamic and versatile solution, combining the breathability and comfort of a trail shoe with the stability and protection typical of hiking footwear.

A solo, 7 May 2026 – SCARPA launches **RIBELLE CROSS 2**, a lightweight hiking shoe designed for fast and confident movement across a variety of terrain, from light hikes and approaches to more dynamic use on the trails.

A new addition to the brand's **light hiking collection**, RIBELLE CROSS 2 is engineered to deliver a smooth and efficient experience, combining the lightness and breathability of a running shoe with the stability and durability typical of hiking footwear. The result is a versatile model, ideal for tackling different environments with confidence.

Lightweight agility for dynamic movement

At the core of the design is a minimal upper made from high-tenacity technical mesh with TPU overlays, developed for fast and precise movement across mixed terrain. This construction strikes a balance between freedom and support, following the natural motion of the foot and providing protection in more exposed areas.

Protection and breathability in warm conditions

The upper materials deliver high breathability, keeping the foot cool during prolonged activity in warm climates. At the same time, TPU reinforcements provide resistance and protection on uneven surfaces.

Efficient movement and trail stability

The full-length **PRESA®** outsole compound ensures durability, traction and stability, supporting fast progression—even on more technical routes. The tread pattern enhances both

push-off and braking phases, maintaining control and confidence across varied terrain.

A complete family for different needs

The RIBELLE CROSS 2 range is available in multiple versions, designed to adapt to different use scenarios:

- **RIBELLE CROSS 2 LOW**
- **RIBELLE CROSS 2 MID** (with ankle support)
- **GORE-TEX** versions available for both constructions

A complete offering that allows users to choose the level of protection and structure best suited to their needs, while maintaining the same dynamic and versatile approach.

For those who move fast in the outdoors

RIBELLE CROSS 2 is designed for an active audience who want continuous movement as they explore the outdoors—where the journey matters as much as the destination. A shoe developed for covering ground efficiently, reaching new viewpoints and environments with minimal effort, while maintaining comfort and control throughout.

Move freely, hike confidently

With RIBELLE CROSS 2, SCARPA introduces a new interpretation of light hiking; a model that supports a **more dynamic and fluid approach**, combining lightness, protection and efficiency in a single solution.

Technical specifications

ABOUT SCARPA

SCARPA was founded on the belief that No Place Too Far exists to be explored. A vision that reflects a deep respect for the mountains, and one that supports those who aim to turn every limit into a new benchmark. Craftsmanship and innovation come together to create footwear for every path, from everyday challenges to the most demanding peaks.

Grounded in a family-owned Italian heritage and a direct production chain, SCARPA has always invested in human relationships built on trust and mutual understanding. Every product is born from a real world need, interpreted with expertise to create high-performance, durable footwear. Authenticity, mountain culture and conscious innovation guide every decision—yesterday as much as tomorrow.

Founded in 1938 in Asolo, in the heart of Italy's Veneto footwear district, SCARPA is an international company specializing in footwear for mountaineering, climbing, trail running, trekking, hiking, outdoor lifestyle, ski mountaineering, and telemark. With offices in Italy, Germany, the United States, and China, and production facilities in Italy, Romania, and Serbia, SCARPA remains a reference point for those who experience nature as a source of freedom and adventure.
