## 8. Ardèche, France

It took many millions of years for the water of the Ardèche to make its way through the southern French mountain landscape. The result is a deep canyon of up to 300-metre-high limestone cliffs and stalactite caves. Hikers and cyclists can explore the most impressive sections between the Vallon-Pont-d'Arc and the Pont-St.-Esprit. In the nearby town of Aubenas the smart #1 and #3 can be fully charged.
