<sup>1</sup> AC charging time (10–100%): The charging time of the battery may vary depending on various conditions such as different environments and battery temperatures, available power and other restrictions, as well as the use of the remote-control function (e.g. remote-controlled air conditioning, preheating of the vehicle, etc.). With a 11 kW home wallbox, you can charge from 10% to 100% SoC (State of Charge) in 8.5 hours. Where a 22-kW on-board-charger is fitted, you can charge from 10% to 100% SoC in 5.5 hours under optimal conditions.

<sup>2</sup> Safety and ADAS: depending on the equipment lines
