

#2

An Ultra-compact Two-Seater.
The Urban Hero.

#2 Line Overview.

smart #2 Line Overview.

It's back! As the urban hero of the all-electric line-up, the smart #2¹ is designed to fit seamlessly into the city. Its ultra-compact format connects with the idea that has shaped smart from the beginning, while its all-electric powertrain, agile handling and everyday usability reflect today's requirements for urban mobility. The turning circle of just 6.95 metres curb-to-curb makes it easy to navigate the smart #2 through tight city areas and also park with confidence. Across the smart #2 line-up, distinct lines offer different expressions of the same urban mobility concept – from the practical Pure and more generously equipped Pure+, to the refined Premium and the limited Couture Edition. Each line brings its own character and equipment, allowing the smart #2 driver to find the best choice to adapt to different preferences and ways of life. That's big.

Pure

Pure+

Premium

Couture Edition

¹Note on the smart #2's vehicle status: The vehicle is currently still undergoing the homologation process (type approval process). The technical specifications, equipment features, and functions listed are based on the current state of development and are subject to change during the homologation process. Delivery will take place once homologation is complete. Upon delivery, the vehicle will correspond to the production specification confirmed by homologation. ²Energy consumption combined in kWh/100 km (WLTP): 13.6 (Pure / Pure+ / Premium / Couture Edition); CO₂ emissions combined (while the car is in operation) in g/km: 0; CO₂ class: A; electric range (WLTP) in km: 290 (Pure / Pure+ / Premium / Couture Edition). These are preliminary details. The vehicle is currently undergoing the EU homologation process. These details are subject to final homologation. Changes are therefore possible. Once the EU homologation process is complete, smart will publish the official figures through the usual channels. ³The charging time of the battery may vary depending on various conditions such as different ambient and battery temperatures, available power and other restrictions (e.g. local legal regulations, technical standards, unbalanced load limits), as well as the use of the remote control function (e.g. remote controlled air conditioning, preheating of the vehicle, etc.). With a 3-phase power supply, you can charge at up to 11 kW and go from 10% to 80% SOC (State of Charge) in just 3 hours under optimal conditions (except with the for smart #2 Pure, which is only available with 7.4 kW a single-phase on-board charger that technically allows for a maximum charging power of 7.4 kW and requires 5 hours to do so). With a DC fast charging station, you can even charge at up to 65kW and go from 10% to 80% SOC in 20 minutes under optimal conditions. ⁴V2L requires special accessory (sold separately). The functionality is only available in type F socket. Hence, in some countries the use may not be possible or restricted as the compatibility may not meet the local standard for external devices. ⁵All smart driver assistance and safety systems are aids and do not release the user from his responsibility as a driver. Observe the information in the operating instructions and the system limits described there. ⁶Illustrations may show optional extras. Deviations possible.

Highlight Features

- Battery type and capacity: Lithium iron phosphate (LFP) battery with 35.8 kWh
- DC charging time (65kW, 10~80%): ≤ 20 minutes³
- Vehicle-to-Load (V2L) capability⁴
- Turning circle of 6.95 metres curb-to-curb
- 5-link rear suspension
- Split Tailgate
- CyberSparksLED with Automatic High Beam Assist
- Bench-style seats-arrangement
- smart Pilot Assist / ACC with Stop & Go and Highway Assist⁵
- 7 airbags (Front Airbags, Far-side Airbag, Front Side Airbags, Side Curtain Airbags)
- Trunk size: 305 L

Available colours

smart #2 Pure

Our confident starting point: The smart #2 Pure is the all-electric urban hero, ready from day one. It combines a 60 kW electric motor with rear-wheel drive and the essential smart features for confident everyday driving. A first-in-class five-link rear suspension and a compact turning circle of 6.95 metres curb-to-curb deliver superior stability and effortless manoeuvring, with 290 km of combined range (WLTP; target value).

The balanced essentialist with comprehensive features.

290 km

Range (WLTP, combined; target value)²

- RWD, 60 kW
- 35.8 kWh Battery
- DC charging up to 65 kW
- AC Charging up to 7.4 kW

- CyberSparksLED with Automatic High Beam Assist
- Bench-style seats-arrangement
- Heated driver seat
- 7 airbags (Front Airbags, Far-side Airbag, Front Side Airbags, Side Curtain Airbags)
- Trunk size: 305 L

Available colours

smart #2 Pure+

Our generous step-up option: Building on the Pure's foundations, the smart #2 Pure+ adds everyday convenience with 11 kW AC charging, enabling a 10-80% charge in three hours, while retaining 65 kW DC fast charging. A heated driver's seat adds comfort on colder days, making the Pure+ a practical upgrade for changing seasons and everyday schedules.

The balanced essentialist with more charging power.

smart #2 Premium

Our even more sophisticated option: The smart #2 Premium brings a refined level of comfort and equipment to the urban experience. A fixed glass roof brings more light into the cabin, while the dedicated 7-speaker Sennheiser Sound System, ambient lighting and heated steering wheel add comfort and style to every journey. Man-made leather seats and a choice of colour combinations allow for further personalisation, giving the Premium line its own sophisticated character within the smart #2 line-up.

The elegant cosmopolitan and characteristic comfort experience.
