

## **Enhanced Safety with Beeline Plus – Speed Camera Alerts Now Available**

**London, 24.06.2025 - Beeline, the innovative navigation platform for cyclists, motorcyclists, and outdoor enthusiasts, is expanding its Beeline Plus premium offering – delivering a safer, more relaxed riding experience.**

### **Innovation Inspired by the Beeline Community**

As with previous product launches, Beeline has placed a strong emphasis on listening to its community. Speed camera alerts were among the most frequently requested features – and are a direct result of ongoing dialogue with users.

Users will now receive timely alerts when approaching known speed camera locations, allowing them to adjust their speed, stay aware of their surroundings, and avoid unnecessary

finer. This update reinforces Beeline’s mission to make every journey safer, smarter, and more enjoyable.

**"Our community trusts Beeline to provide intuitive and helpful navigation. With speed camera alerts in Beeline Plus, we're now enhancing safety and supporting proactive riding even further."**

Mark Jenner, Co-Founder Beeline

**Beeline app**

Easily discover better routes.

Available free of charge.

## Beeline Plus – Rethink the Ride

The speed camera alerts add to a growing suite of premium features already included in Beeline Plus – such as advanced route planning, live traffic updates, and exclusive map layers. With this latest update, Beeline Plus offers a comprehensive package to help users get the most out of every ride.

## Availability of Speed Camera Alerts

Speed camera alerts in Beeline Plus are available now. Existing subscribers will receive the update automatically.

New users can upgrade directly within the Beeline app.

In Europe, Beeline Plus is available as a monthly subscription for €4,49 or as an annual subscription for €44.99.

## Legal Notice

Speed camera alerts are only available in Beeline Plus regions where permitted by law. Due to legal restrictions, speed camera alerts are not available in **France, Germany and Switzerland.**

Availability is determined by the user’s current location, not their country of residence. This means that French subscribers travelling in Italy or Spain, for example, can access speed camera alerts while riding there.

## About Beeline

**We're building a world where getting on two wheels is easy and knowing where you're going is even easier.**

Our mission is simple: to make every ride safer, more enjoyable, and more connected to the world around you, wherever you're going.

Beeline exists to empower cyclists and motorcyclists with navigation tools that are intuitive, beautifully designed, and built to last. Whether it's your daily commute or a weekend ride into open countryside, we help you stay focused on the ride, not the tech.

From twisty lanes to city streets, Beeline makes space for riders to stay present, explore freely, and enjoy the journey.
