

Beeline Moto II: Premium motorcycle navigation now available in India

London (UK), 13/08/26 - Beeline, the British company behind beautifully simple navigation for motorcyclists, today announces the launch of Moto II in India, bringing its unique approach to motorcycle navigation to one of the world's largest and most passionate riding communities.

Designed for the ride

Designed from the ground up for motorcyclists, Moto II combines intuitive navigation with a clean, distraction-free interface, giving riders the confidence to explore somewhere new while keeping their focus where it belongs - on the ride.

Home to one of the world's largest and most passionate motorcycle communities, India is a country of every kind of rider - from daily commuters to weekend explorers and long-distance

tourers. Moto II has been created to make every ride simpler, whether navigating busy city streets or discovering new roads beyond them.

Riders can plan routes in the free [Beeline app](#) or [Online Route Planner](#) before following intuitive turn-by-turn guidance or Beeline's unique Compass Mode, offering a simpler, more enjoyable way to navigate without constantly focusing on a screen.

Moto II was designed not only to navigate brilliantly, but to look like it belongs on a motorcycle. Its minimalist design, bright colour display, enlarged screen and glove-friendly RockerTop 2 buttons combine to create a navigation experience that feels intuitive from the moment you set off.

"We're delighted to bring Moto II to riders in India. India has one of the world's most passionate motorcycle communities and we're excited to introduce a navigation device designed specifically for the way people love to ride."

Tom Putnam, Co-founder, Beeline

Now available in India

The Beeline Moto II is available to order now from [Amazon India](#). Models and prices:

- **Moto II Black Standard** - ₹22,499
- **Moto II Metal Edition** (Gunmetal Grey & Silver) - ₹24,999

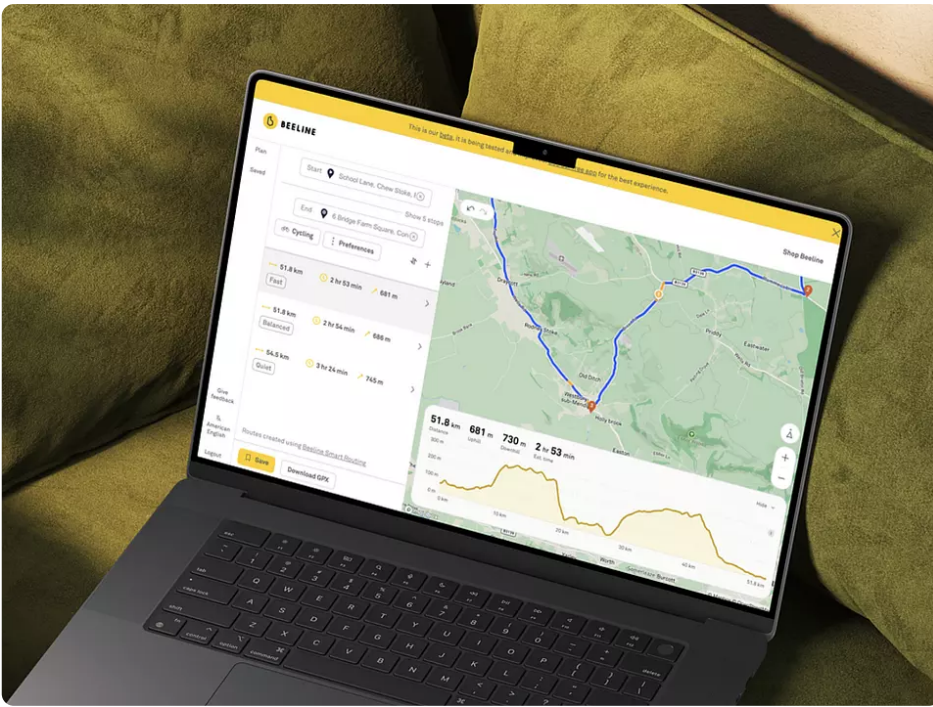

Key features

- **Turn-by-turn navigation** - Clear guidance with a mini-map and intuitive junction instructions
- **Compass Mode** - A uniquely simple way to navigate while preserving the joy of exploration
- **Large colour display** - Clear, glanceable navigation
- **RockerTop 2 buttons** - Easy to use, even with riding gloves
- **Worldwide maps** - Ready to ride anywhere, straight out of the box
- **GPX import** - Import routes from our favourite planning tools in seconds
- **Online Route Planner** - Plan routes on desktop and automatically sync them to the free Beeline app
- **Universal mounts** - Secure mounting options for almost any motorcycle

"We don't believe navigation should dominate the riding experience. Moto II was designed to quietly do its job, giving riders the confidence to explore somewhere new while keeping their attention where it belongs – on the road ahead."

Mark Jenner, Co-Founder Beeline
