

FENDER® ADDS TUBE TREMOLO TO EFFECT PEDAL LINE DESIGNED TO ENHANCE PLAYERS TONE

AVAILABLE SPRING 2020, FENDER EXPANDS COMMITMENT TO PEDALS CATEGORY

HOLLYWOOD, Calif. (January 17, 2020)—Fender Musical Instruments Corporation (FMIC) today announced the expansion of its popular effects pedals line with a new Tube Tremolo model debuting at Winter NAMM 2020 in Anaheim, Calif. Priced at \$199.99, the introduction of this original-designed circuit further diversifies Fender's offering to serve all tonal needs.

Designed in Southern California by Fender's in-house team of experts, this all-new effect marks the brand's next foray into tube-driven effects pedals. The MTG Tube Tremolo leverages Fender's tube amplifier technology and places it in a convenient stomp box format.

"We are proud to continue the expansion of our effects pedal line and our commitment to helping players own their tone at every stage of their musical journey," said Richard Bussey, Director of Product Development – Accessories and Consumer Electronics. "Since no one knows tube tremolo tone like Fender, we're launching the newest member of our tube based MTG Series – the MTG Tube Tremolo. It's everything you'd expect from Fender in a compact stompbox."

Fender effects pedals are engineered for artists who are looking for stage-ready features and Fender's signature sound and aesthetics, including sleek and modern exteriors crafted from lightweight, durable anodized aluminum. The enclosures are engineered for heavy-duty use, while the LED backlight readies players to take the stage and give their best performance in any environment. This all-original circuit has enhanced feature sets that provide players with maximum tonal possibilities.

· **MTG Tube Tremolo (\$199.99)** brings the hypnotic sound typically found in vintage amps and places it in a stompbox based on a genuine U.S. Made NOS 6205 preamp tube. The pedal features Level, Intensity, and Speed controls, three different waveform modes via the Wave knob and a dedicated tap tempo which allows access to various note subdivisions. "The MTG Tube Tremolo is another collaboration between Bruce Egnater and Fender, and it offers an all-analog audio path featuring a 6205 vacuum tube with a highly capable digital control circuit for incredible modulation flexibility," said Stan Cotey, VP of Product Innovation at Fender. "The pedal features multiple oscillator waveshapes for a myriad of sounds along with bypass and tap tempo footswitches. Like all of Fender's MTG tube-based pedals it is able to be powered from a 9VDC power supply and does not require a separate unique power supply."

Fender's new MTG Tube Tremolo effect pedal will be available in Spring 2020 at local dealers and on www.Fender.com. To learn more about Fender's full line of effect pedals and for product descriptions of each model click [here](#). For series product images click [here](#).

ABOUT FENDER

Since 1946, Fender has revolutionized music and culture as one of the world's leading musical instrument manufacturers, marketers, and distributors. Fender Musical Instruments Corporation (FMIC)—whose portfolio of owned and licensed brands includes Fender®, Squier®, Gretsch® guitars, Jackson®, EVH®, Charvel®, Bigsby®, and PreSonus® – follows a player-centric approach to crafting the highest-quality instruments and digital experiences across genres. Since 2015, Fender's digital arm has introduced a new ecosystem of products and interactive experiences to accompany players at every stage of their musical journey. This includes innovative apps and learning platforms designed to complement Fender guitars, amplifiers, effects pedals, accessories, and pro-audio gear, and inspire players through an immersive musical experience. FMIC is dedicated to unlocking the power of musical expression for all players, from beginners to history-making legends. In 2026, Fender celebrates 80 years of giving artists "wings to fly," carrying on the vision of its founder, Leo Fender, and connecting players through a shared love of music.
