

PRESONUS RELEASES STUDIO ONE™ 6, COMPREHENSIVE UPGRADE TO AWARD-WINNING DAW, UNLOCKING CREATIVITY FOR COMMITTED PROFESSIONALS ACROSS GENRES

**BEST-IN-CLASS MUSIC PRODUCTION SOFTWARE ADDS INDUSTRY
FIRSTS, CUSTOMIZABLE INTERFACE, LYRIC SUPPORT, OPTIMIZED
MIXING TOOLS, GLOBAL VIDEO TRACK, SMART TEMPLATES, NEW
PLUGINS, COLLABORATION ENHANCEMENTS AND MORE**

HOLLYWOOD, Calif. (Sept. 29, 2022) — [PreSonus Audio Electronics, Inc.](#) today announced the global launch of Studio One™ 6, the latest version of the company's award-winning music production software for macOS and Windows. Studio One™ 6 is the most recent chapter in the evolution of one of the bestselling digital audio workstations in the world, featuring industry-leading innovations, mixing improvements and the most advanced user

interface customization options available. Version 6 makes audio content creation fast and easy, with everything you need to record, produce, mix, master and perform in a single intuitive application. Studio One 6 is available for purchase as a *perpetual one-time license*, or as an *annual or monthly subscription to PreSonus Sphere* via PreSonus.com and participating dealers. In addition to the latest two versions of Studio One™ Professional, PreSonus Sphere™ members get access to expanded collaboration tools in Studio One™ and online, Community, exclusive educational content, all PreSonus software and add-ons giving the best value to creators and the ultimate Studio One™ experience. With additional landmark innovations in the works for future iterations, Studio One™ 6 is just the start of the rollout of a new and improved feature set to support recording professionals.

“In this latest iteration, the team stayed focused on listening to loyal users’ needs, creating innovative solutions to boost productivity in the professional audio production space,” said Arnd Kaiser, General Manager, Software at PreSonus. “We want engineers, producers, recording musicians and creators around the world to feel supported and inspired to build their best work yet. Studio One™ has evolved over the past 12 years and is now an established major player in the audio production space known for unique features and a fast, intuitive workflow. We continue to push the boundaries of what’s possible in recording and are now the first digital audio workstation in the industry to feature end-to-end lyric support for both audio and MIDI, from songwriting to recording and live performance.”

“We are excited for the launch of Studio One 6 and are fully invested in supporting the continued expansion and adoption of Studio One as the total solution for professional and committed at-home creators,” said Evan Jones, CMO, FMIC. “The global adoption of digital creative and productivity tools continues to grow and expand across all forms of musical expression, in the hands of an even wider audience of creators, producers, mix engineers, and artists. Together with PreSonus hardware and Studio One™ we’re providing the total solution for professional and committed at-home creators, and we can’t wait to hear the music they’ll make.”

Studio One™ 6 offers major new features and enhancements to boost creativity for seasoned professionals; moreover, the redesigned and customizable user interface helps creators focus on the task at hand. Studio One™ 6 is available in both perpetual (priced at \$399.95 USD for Professional) or as part of the PreSonus Sphere™ subscription, which gives

members every upgrade for free. Going forward, PreSonus Sphere™ members (\$14.95/month or \$164.95 annual) will always have access to the current version of Studio One™ Professional as well as one version back, giving them the freedom to upgrade whenever it works best with their projects.

Studio One™ 6's top new features include:

- 1. Smart Templates:** New Smart Templates combine preconfigured tracks and channels with a customized user interface and automatic download of required content to get started recording and producing right away. Smart Templates provide essential tool sets for the tasks at hand, including basic recording, beat making, mixing stems, mastering an album, setting up for a live show and more. Smart Templates include a convenient drop zone to easily import needed content like audio, video and MIDI files as well as interactive tutorials with instructions and links to related video content.
- 2. Customization Editor:** The new Customization Editor provides a convenient and easy way to show or hide nearly all tools and functions, customizing the user interface to create a streamlined, focused workflow for the task at hand. First-time users, seasoned professionals and everyone in between can create a Studio One™ interface customized for their needs. Best of all, customizations can be saved to recall at will — a few for essential workflows are provided as jumping-off points.
- 3. Industry-leading Lyrics Support:** Studio One™ 6 now provides powerful, industry-leading lyric support. Lyrics can be added to scores, MIDI productions, audio sessions – even live performances! Use the all-new Lyrics Display as an editor, a teleprompter or a quick, innovative way to navigate a lyric-laden production. When working with Score or Piano view, lyrics can be attached to notes word by word or by syllable. Lyrics can also be transferred to the Show Page to use during rehearsals or performances.
- 4. Global Video Track:** Content creators and sound-to-picture professionals alike will appreciate the all-new Global Video Track and its intuitive workflow. Add video clips by simply dragging video files onto the timeline. The Video Track can hold an unlimited number of video clips, making it easy to work on multiple reels of a feature film in a single session. Video thumbnails are generated automatically to provide a preview for easy navigation. A dedicated sub-track is provided for embedded audio to use as reference, complete with mixer channel, full plug-in processing and output routing options.

5. **Advanced PreSonus Sphere™ Collaboration:** Studio One™ 6 deepens the integration with the PreSonus Sphere™ fully loaded with powerful, cloud-based collaboration Workspaces, using convenient sharing options and built-in sync options right from the main menu. An all-new comprehensive installation window lets members quickly explore, download and install exclusive PreSonus Sphere™ content, with a variety of display, search and filter options.
6. **New Plug-ins:** It wouldn't be a Studio One™ upgrade without new and improved Native plug-ins and version 6 is no exception. The Studio One™ new De-Esser is an efficient and intuitive tool for taming vocal sibilance and other high-frequency sounds. The new Vocoder is a creative playground that lets users turn a voice or any audio source into a unique synth or effect. Finally, the ever-popular ProEQ, Autofilter, Mai Tai, Sample One XT and Presence XT have all been significantly enhanced and improved.

"From 2017 on, Studio One™ has been the official DAW here at Studio DMI, in every room, for every purpose," said Luca Pretolesi, Grammy Nominated Mixing and Mastering Engineer at Studio DMI Las Vegas. "Every record I've worked on so far, from big album projects like Drake to dance records for Diplo, has been done in Studio One™. PreSonus Studio One™ 6 is out and it's great. There are so many improvements and I think everyone at PreSonus read my mind. They elevated certain functionality and features that are very important for my workflow, especially the Channel Overview. Staying on one channel and being able to access everything on the channel is a key element for me. I love the additional function on the sidechain; it was already crazy before. The ProEQ3 is even better. The dynamic functionality and the solo make it the ultimate EQ in a plugin format."

Studio One™ 6 introduces a long list of additional new features and enhancements, including improvements to the Console, the Browser, the Start Page and much more. In addition, the Studio One™ 6 Console is also packed with new features developed at the request of the loyal Studio One™ community. Fader Flip lets users control FX/Bus sends, sidechains and Cue Mix sends all from the main faders. Stereo channels now feature a choice between balance, dual or binaural panning as well as a new panner pop-up editor. The new Channel Overview provides a single, consolidated view of all channel parameters, including input controls, inserts, sends and Cue Mix sends for the selected channel that can be pinned to keep a critical eye on individual channels. Finally, Studio One™ 6 takes

workflow efficiency to a new level with Track Presets, storing every aspect of a given track or channel for instant recall, even for multiple selected tracks/channels.

ABOUT PRESONUS AUDIO ELECTRONICS, INC.:

PreSonus Audio Electronics Inc. is the leading designer and manufacturer of recording and live-sound hardware and software solutions that solve real-world problems for creatives of all levels. Founded in 1995 and headquartered in Baton Rouge, La., PreSonus designs innovative audio tools for musicians, content creators, producers and audio engineers, providing professional sound quality and features without sacrificing affordability. Today, PreSonus is an owned brand under Fender Musical Instruments Corporation (FMIC). While most guitar and bass players still plug into amplifiers, many also plug their instruments into interfaces, recording songs as well as using virtual amps and effects to create their sounds. With a shared passion for music and a commitment to innovation, FMIC and PreSonus are focused on delivering an ecosystem that seamlessly integrates hardware and software for an effortless end-to-end experience. ABOUT FENDER

Since 1946, Fender has revolutionized music and culture as one of the world's leading musical instrument manufacturers, marketers, and distributors. Fender Musical Instruments Corporation (FMIC)—whose portfolio of owned and licensed brands includes Fender®, Squier®, Gretsch® guitars, Jackson®, EVH®, Charvel®, Bigsby®, and PreSonus® – follows a player-centric approach to crafting the highest-quality instruments and digital experiences across genres. Since 2015, Fender's digital arm has introduced a new ecosystem of products and interactive experiences to accompany players at every stage of their musical journey. This includes innovative apps and learning platforms designed to complement Fender guitars, amplifiers, effects pedals, accessories, and pro-audio gear, and inspire players through an immersive musical experience. FMIC is dedicated to unlocking the power of musical expression for all players, from beginners to history-making legends. In 2026, Fender celebrates 80 years of giving artists “wings to fly,” carrying on the vision of its founder, Leo Fender, and connecting players through a shared love of music.
