ABOUT — ONE-LINE BOILERPLATE

Lobo Builders

Lobo Builders is a family-owned custom home builder based in Asheville, North Carolina. For over 20 years, we have partnered with discerning homeowners to design and build custom homes, historic renovations, and green-built residences throughout Western North Carolina.

BACKGROUND

Two decades of building in the Blue Ridge.

Lobo Builders was founded in 2005 by Thomas and Annie Wolfe with a simple conviction: that a custom home should be as considered, resilient, and site-specific as the family who lives in it.

Two decades later, we remain a family-run studio of builders, designers, and project managers working exclusively in Western North Carolina. Our team specializes in custom homes, historic renovations, and high-performance green construction across Asheville, Black Mountain, and the surrounding mountain communities.

We take on a limited number of projects each year so that every home receives our senior team's direct attention — from the first site walk through final walkthrough and long after.

HOW WE BUILD

A philosophy of permanence & place.

Every Lobo Builders home is shaped by three commitments that guide every decision from schematic design through the final punch list.

01 Exclusive Partnerships

We work with a curated network of architects, designers, and tradespeople who share our standards. Small teams, senior attention, and continuous communication throughout the build.

02 A Unique Vision

No two Lobo homes look alike. We start from the client's life, the site's terrain, and the region's vernacular — then design a home that could stand nowhere else.

03 Crafted for Longevity

We build for the second and third owners as much as the first. Durable materials, tight envelopes, and high-performance systems that hold their value for decades, not warranties.

WHAT WE BUILD

Services.

Custom Homes

Ground-up design-build for primary residences, mountain retreats, and legacy family properties across Western NC.

Historic Renovations

Sensitive restorations and full renovations of Asheville's craftsman bungalows, Montford-era homes, and mid-century originals.

Green Building

High-performance envelopes, passive-solar orientation, and Green Built NC-certified construction with a lower lifetime footprint.

WHO WE BUILD FOR

Client Specialization.

Legacy homeowners

Multi-generation families building the primary or forever home.

Second-home builders

Out-of-region clients establishing a Blue Ridge retreat.

Historic stewards

Owners of Asheville's protected and character-district properties.

Design-forward clients

Working directly with their own architect or designer.

Performance-minded

Owners prioritizing energy performance and material longevity.

Referral network

Generated by past clients, architects, and trade partners.

SELECTED PORTFOLIO

Notable Projects.

A cross-section of recent custom homes, renovations, and mountain retreats. Full portfolio and high-resolution imagery available on request.

Modern Mountain Peak
New construction · Asheville

MidCentury Micro House
